

If printed 17 inches tall (from black-outlined edge to black-outlined edge) the scale of these drawings is 1/350.

NOTES

DECK 4
The Hangar Bays extend from Deck 3 down to Deck 6. The Shuttlecraft Maintenance area is located on Deck 7.

Flight Control is at the front of each Hangar Bay and Ladders lead down to the Hangar Deck. Inboard of Flight Control is a Lounge.

A Landing Tractor Beam is located just inside the Hangar Bay doors.

Stairs for mass exodus via the hatch on Deck 2 start on this deck. Storage spaces (EL) are located nearby. These contain full spacesuits, partial suits, air-testing kits, etc ... useful if exiting via the top hatch.

At the extreme port and starboard are Emergency Batteries.

Aft of the Batteries is Tactical & Warfare Countermeasures Equipment (EW), as well as related work stations.

Main Engineering's Highbay is at the rear, surrounded by Deuterium Tanks.

The Emergency Manual Monitor is ahead of and starboard of the Engineering Highbay, but it can only be reached by a ladder from below, on Deck 5. The Engineer's office is ahead of and port of the Highbay.

DECK 4 (continued)
Most of the Quarters in the Primary Hull are laid out in rings. The rings are labeled from the center outwards, starting with A, then B, then C, and so on.
The rest of the Quarters are labeled in rows from the center outwards.

There are sufficient Junior Officers' quarters such that they don't have to share quarters with anyone else, even if there are two beds shown.

The ship could help with rescue missions, diplomatic missions, or help evacuate / transport colonists if such a need should ever arise.

DECK 4: JUNIOR OFFICERS' QUARTERS AND CREW QUARTERS
