

NOTES

DECK E

The Auxiliary Control Room is located at the front of this deck, just behind the Deflector Equipment. It is surrounded by computers. To port and starboard of the Auxiliary Control Room are two of the three Space Energy Field Sensors. Aft of the Sensors is a Briefing Room on the port side and the Armory on the starboard side.

V.I.P. Quarters are in the middle of the deck, 2 on each side.

Cargo Operations is not a full-time requirement. When there is no cargo being processed, this area is used for greeting dignitaries, or as a staging area for Landing Parties. Equipment for these functions is located in the Cargo Holds.

The Cargo Lift starts here and reaches up to Deck B. The Cargo Holds also start here and continue up to Deck B. The cargo can arrive and depart by Shuttlecraft or by the hatches on the top of the hull.

The Hangar Bay is aft of the Cargo Holds. It is also known as the Flight Deck.

A Cargo Shuttlecraft from THE ANIMATED SERIES is shown here. Standard Shuttlecraft are 28 feet (8.5 meters) long. See the Shuttlecraft drawing and Note "M" on Page 7 for more info.

DECK F

Deflector Equipment is flanked to port and starboard by the Space Energy Field Sensors.

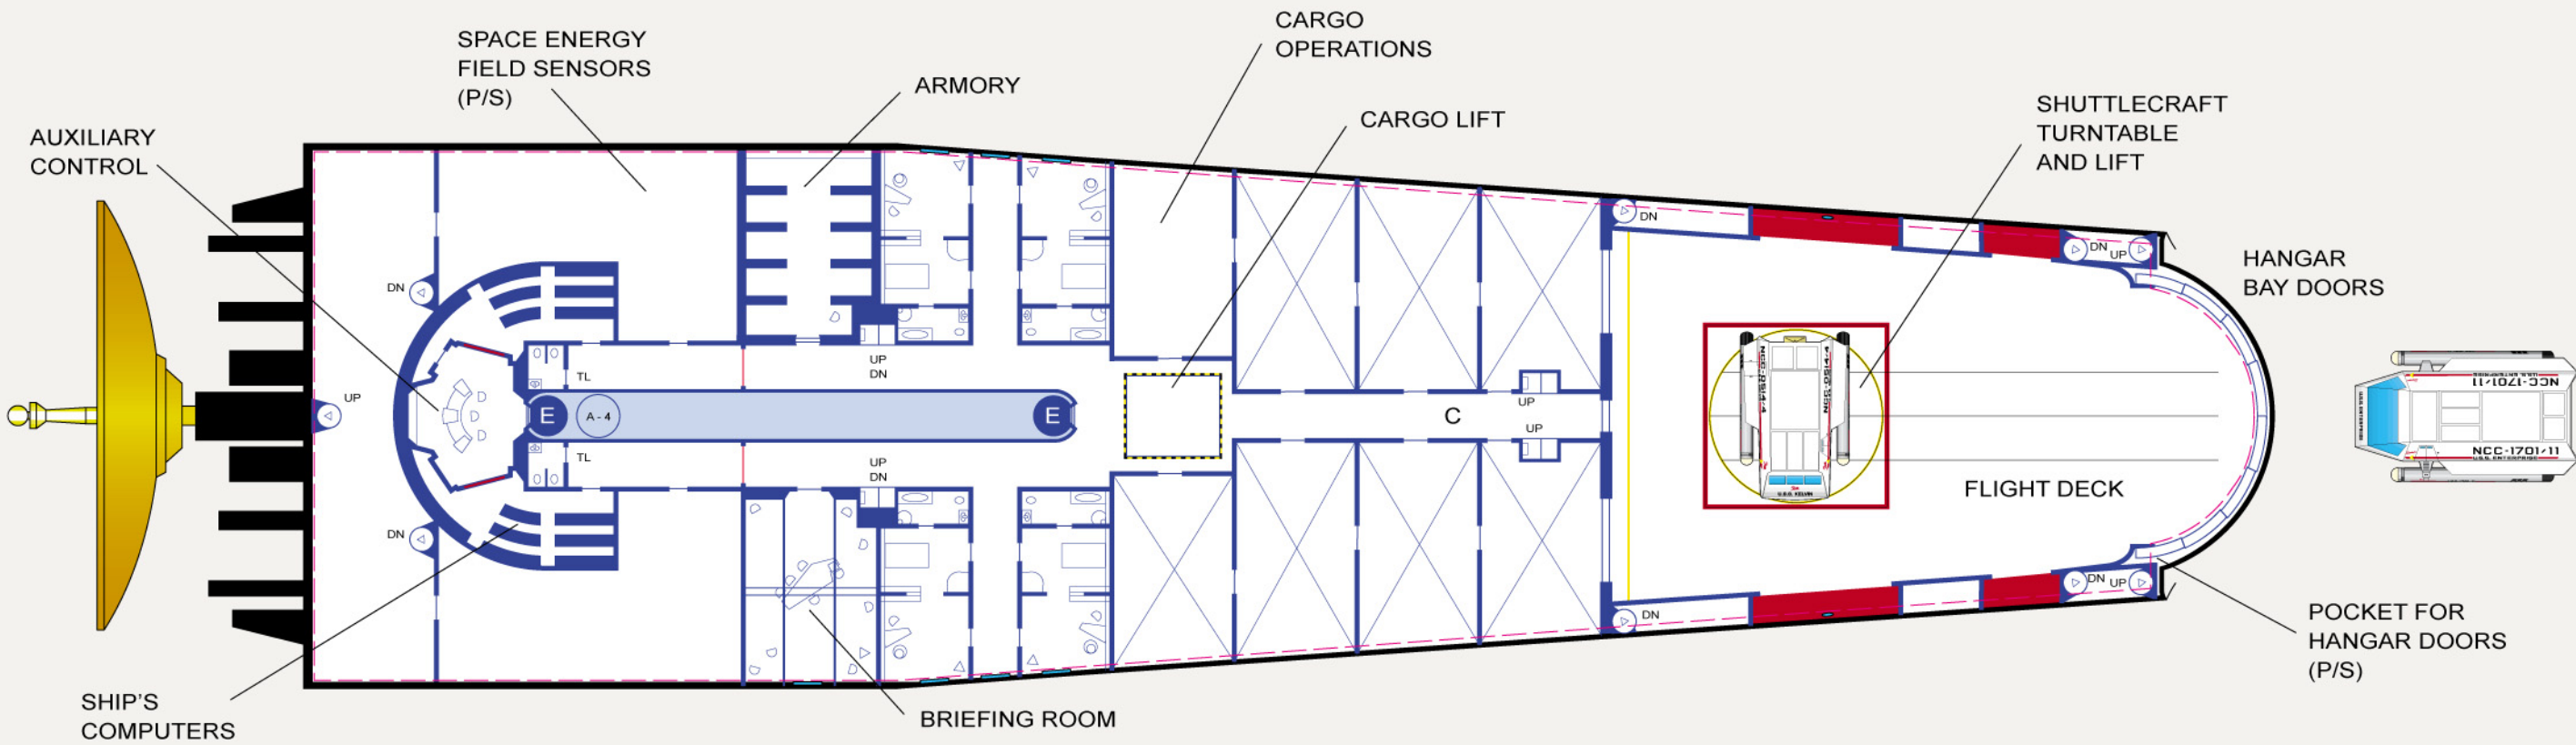

Cold Storage is aft of the Deflector Equipment. Aft of the Space Energy Field Sensors is the Organic Material Storage.

On each side, further aft of the Organic Material Storage is a large Food Preparation area.

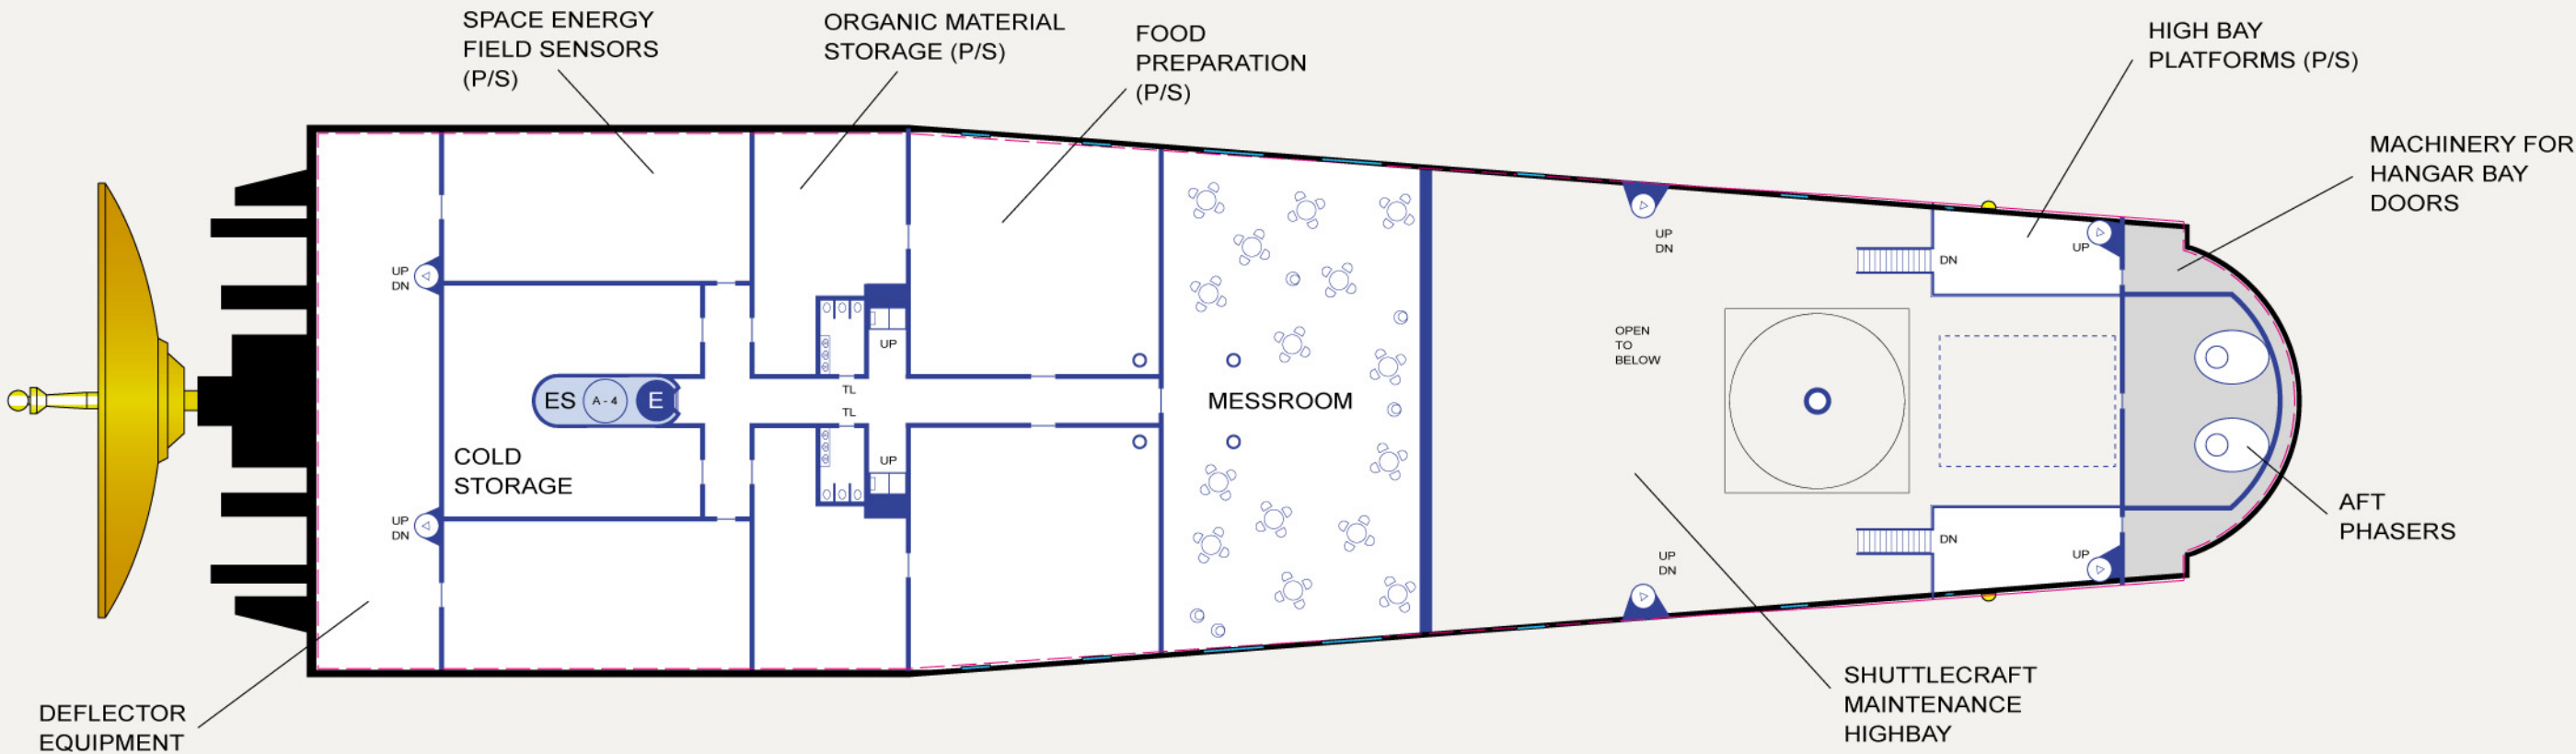

The Messroom is at the aft end of the corridor.

The Shuttlecraft Maintenance High Bay is further aft but there is nothing to access in the High Bay. Ladders continue through the High Bay from the Flight Deck above on Deck E down to the Shuttlecraft Maintenance Bay on Deck G. The Shuttlecraft Maintenance Bay can be accessed directly from Deck G below.

At the extreme rear of the High Bay (located on the fantail of the Secondary Hull) are the Aft Phasers. On either side of the Aft Phasers is the Hangar Bay Door Machinery. This machinery and the Aft Phasers can only be accessed from the Shuttlecraft Maintenance Bay, by climbing stairs up to the port and starboard Platforms.

DECK E: AUXILIARY CONTROL / V.I.P. QUARTERS / HANGAR DECK

DECK F: FOOD PREPARATION / SHUTTLE MAINTENANCE
