

If printed 17 inches tall (from black-outlined edge to black-outlined edge) the scale of these drawings is 1/350.

NOTES

DECK 5
The layout of this deck is very similar to the FJ design. I like the tri-radial symmetry of his design. However, his turbo-elevator shafts were not set at 120° so I adjusted them.
There is also one turbo-elevator storage space.

I retained the Batteries, Air Conditioning, Water Pumps, etc. as well as the Phasers in the outermost ring around the Officers' Quarters.

In the center are 3 relaxation areas. The one at the front is a Lounge. The other two are considered\ to be Messrooms because they are serviced by food dispensers which are directly connected to the Food Preparation area on Deck 8.

Environmental Lockers (EL) and Circuit Breakers fill the rest of this deck.

DECK 5 DORSAL
A connection exists between Deck 5 and Deck 5 DORSAL, but the ceiling drops down at the transition. Therefore, the Piping / Wiring Trunk has been split to either side to maximize headroom.

Further aft, the stairs lead down to the Impulse Engineering Highbay.

DECK 5: SENIOR OFFICERS' QUARTERS
