

If printed 17 inches tall (from black-outlined edge to black-outlined edge) the scale of these drawings is 1/350.

NOTES

DECK 10

TMoST mentions Photon Torpedoes but not their location. Photon Torpedoes were shown in various episodes of STAR TREK to emanate from the underside of the Primary Hull, approximately the same place as the Phasers. Since TMoST states Phaser Banks are on Deck 11, the logical spot for Photon Torpedoes and their launch system is on Deck 10.

TMoST states that miscellaneous activities and cargo spaces are on Deck 10. Since cargo spaces are on this deck, it is logical to place a Cargo Transporter here.

In the middle is Tractor Beam Equipment in support of the Emitters and Controllers on Deck 11.

DECK 10 VENTRAL

Engineering Monitoring Stations are located here.

DECK 11

Phasers are located on this deck.

The equipment around the perimeter is for the Tractor Beam. The 3 Tractor Beam Controllers direct the Emitter so that the beam can locate and lock onto the object being towed.

The 3 pale gold-coloured recessed rings on the underside of the Primary Hull absorb and re-direct any back-scatter created by the Tractor Beam.

DECK 11 VENTRAL

Engineering Monitoring Stations are located here.

DECK 10: VENTRAL

DECK 10: PHOTON TORPEDO LAUNCHERS / TRACTOR BEAM

DECK 11: VENTRAL

DECK 11: PHASERS / TRACTOR BEAM
