

If printed 17 inches tall (from black-outlined edge to black-outlined edge) the scale of these drawings is 1/350.

NOTES

DECK 15
A Sanitary Waste Recovery System is located here to service the Secondary Hull. Stairs lead down to the Main Cargo Hold.

At the extreme aft is the Tractor Beam Emitter and associated equipment. This area can only be accessed by ladder from Deck 14.

DECK 16
This Space Energy Field Sensor works with the other 2 located in the rectangular protrusions on Deck 12.

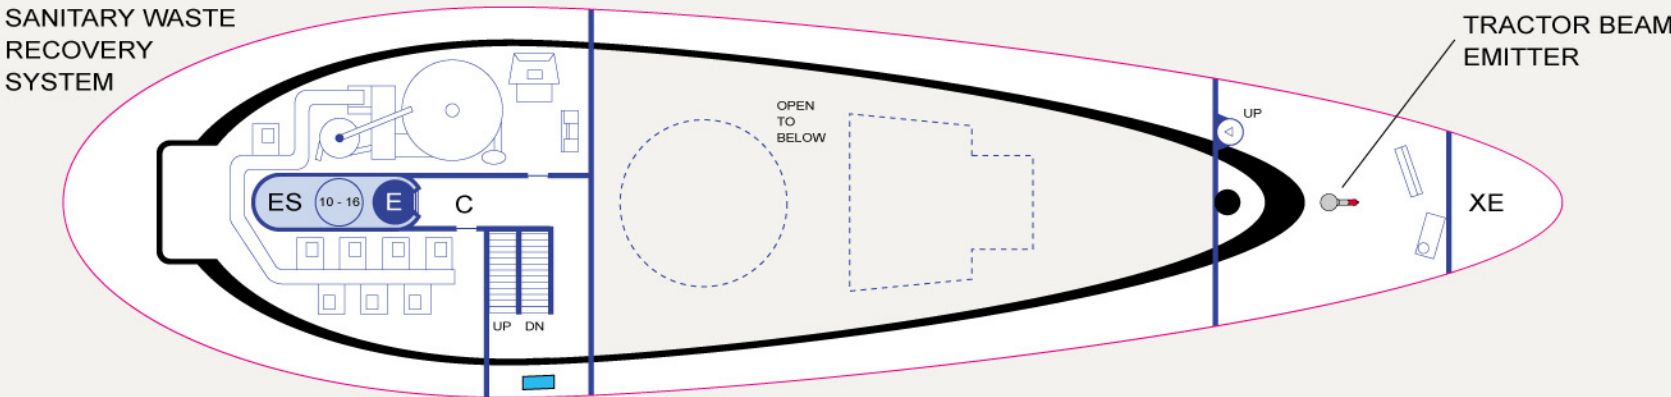

Under / behind the stairs is an Enviromental Locker. The Airlock provides access to the Main Cargo Hold. Oversized material can be delivered here, and is then distributed to the Cargo Holds on the decks above.

FROM THE EPISODE "Bread and Circuses" (continued)

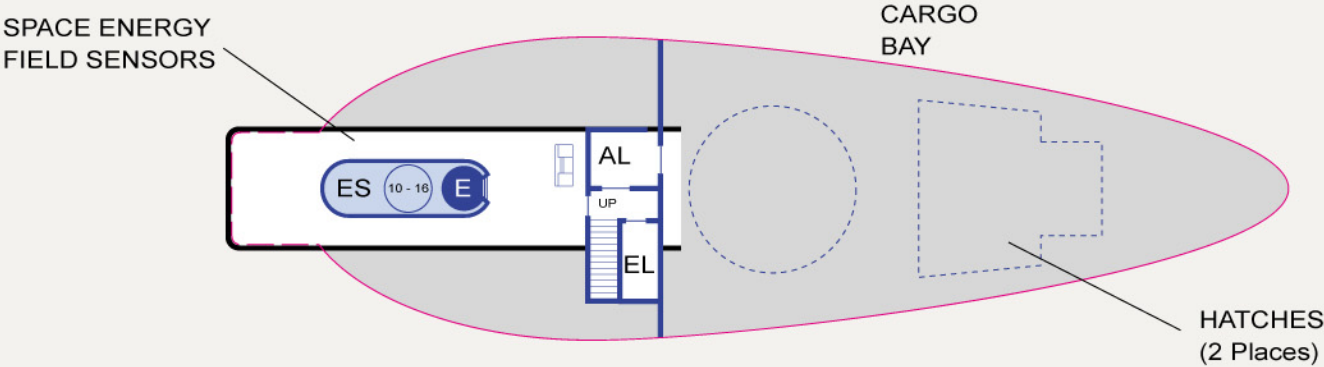

KIRK: All right, what happened?
MERIK: We had meteor damage, Jim. I went ashore with a landing party to look for iridium ore for repairs, and I met this gentleman.

KIRK: What happened to your crew? Did they voluntarily beam, come ashore?
MERIK: This is an ordered world, Jim, a conservative world based on time-honored Roman strengths and virtues.
KIRK: What happened to your crew?

CLAUDIUS: Captain, which world do you prefer?
KIRK: My world, proconsul, is my vessel, my oath, my crew. What happened to your vessel, Merik, you've explained. What happened to your oath is obvious.
MERIK: And as for my men, those that were able to adapt to this world are still alive. Those who couldn't adapt are dead. That's the way it is with life everywhere, isn't it?
KIRK: You sent your own men into the arena?
MERIK: Just as I did, Jim, you're going to order your own people ashore.
