

If printed 17 inches tall (from black-outlined edge to black-outlined edge) the scale of these drawings is 1/350.

NOTES

DECK 10
TMoST mentions Photon Torpedoes but not their location. Photon Torpedoes were shown in various episodes of STAR TREK to emanate from the underside of the Primary Hull, approximately the same place as the Phasers. Since TMoST states Phaser Banks are on Deck 11, the logical spot for Photon Torpedoes and their launch system is on Deck 10.

Surya-class Frigates have Photon Torpedo Launchers and the Launch Control system on this deck, but the Durrett-class Light Cruisers have Photon Torpedo Launchers in the Weapons Pod. Therefore, that whole system was removed from Deck 10 and a Phaser Control Room was installed.

TMoST states that miscellaneous activities and cargo spaces are on Deck 10. Therefore, the rest of the deck is filled with Cargo Holds.

DECK 10 DORSAL
The disconnection equipment is located on this deck. This area is kept clear and is difficult to enter except by authorized personnel. It is accessible only by ladders.

DECK 11
Phasers are located on this deck.

The equipment around the perimeter is for the Tractor Beam. The 3 Tractor Beam Controllers direct the Emitter so that the beam can locate and lock onto the object being towed.

The 3 pale gold-coloured recessed rings on the underside of the Primary Hull absorb and re-direct any back-scatter created by the Tractor Beam.

DECK 11 DORSAL
This is a Lounge.

DECK 10: PHASER CONTROL / CARGO

DECK 11: PHASERS / TRACTOR BEAM
