

NOTES

DECK 23
The Deflector Equipment area at the front supports the Space Energy Field Sensors on Deck 24, below.

TMoST says the ship has six Personnel Transporters (for 6 people), five Emergency Transporters (for 22 people), and 2 Cargo Transporters. A discussion about Transporter Rooms is on Page 17.

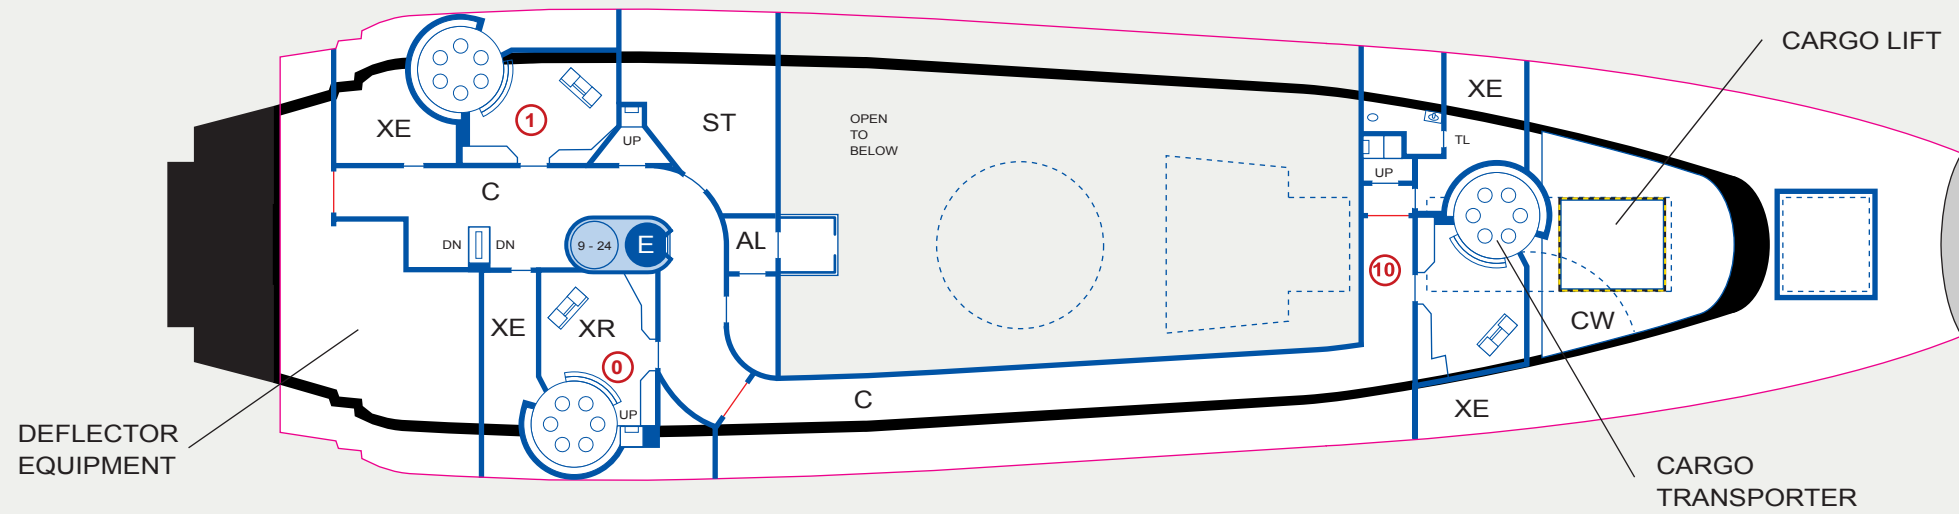

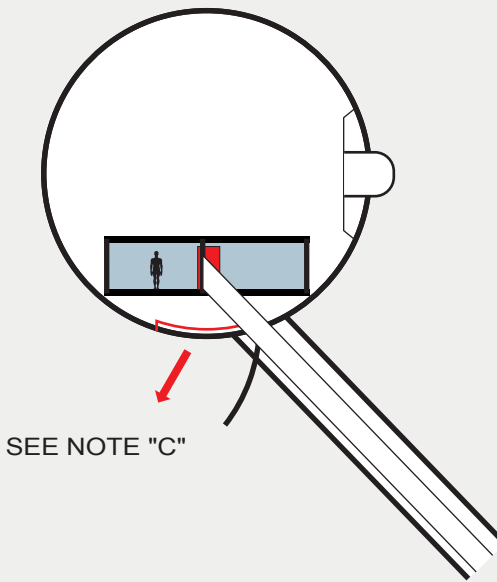

The final cargo hold is on this level. This oversized cargo hold in the middle of the deck has an airlock at the front and can also open to the vacuum of space via the two large hatches on the underside of the hull.

The Cargo Lift reaches from Deck 19 down to this level. It is ahead of the hatch for the Ion Storm Pod.

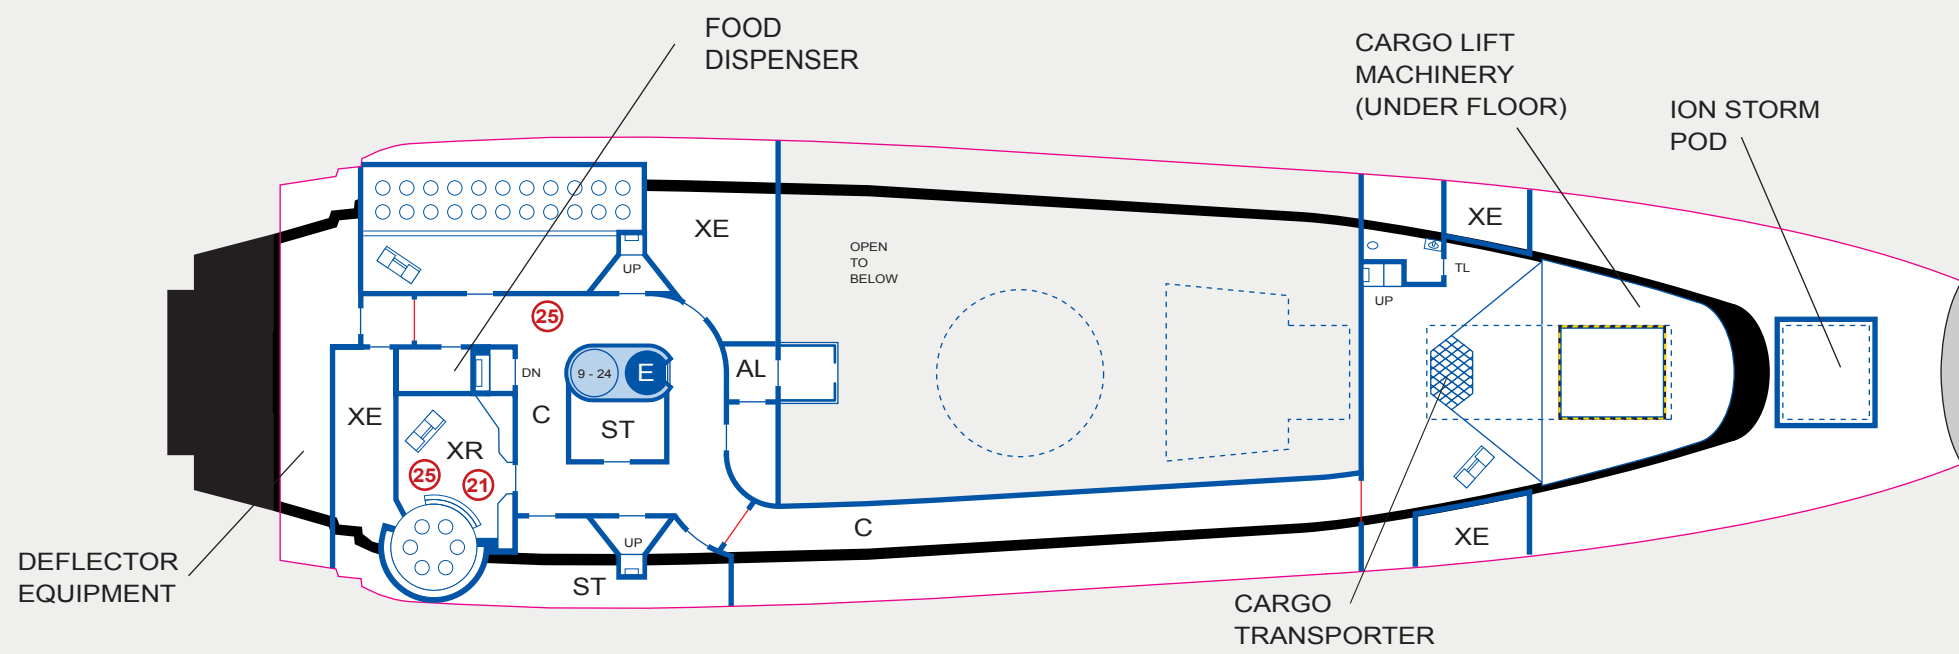

The fantail starts with a steep upward slope at the extreme rear of this deck. This is shown in grey.

DECK 23 ALTERNATE
The reasons for the changes to the Transporter Rooms are discussed on Page 17.

STARBOARD ENGINE INSPECTION STATION
(Cross-section, Looking Aft)

DECK 23: TRANSPORTERS (Original Configuration) / CARGO DECK 15 (Secondary Hull)
