

**NOTES**

**DECK 8**  
TMoST states that the ship's Laundry, Food Preparation, Main Recreation and Entertainment areas are here.

The Auxiliary Control is seen many times in 2 different configurations. It is surrounded by the ship's Main Computers which continue here from the center of Deck 7. We also see this area on the U.S.S. CONSTELLATION.

Nurse Christine Chapel entertained children in a "garden". The garden was a new set built for Season 3. There was an intricate planter in the center, shown here in the park.

The Water Storage found here is an extension of the Water Storage on Deck 7 as mentioned in TMoST.

The Food Preparation area has two "conveyors" which distribute food upwards into the Messrooms located on Deck 6 and Deck 5.

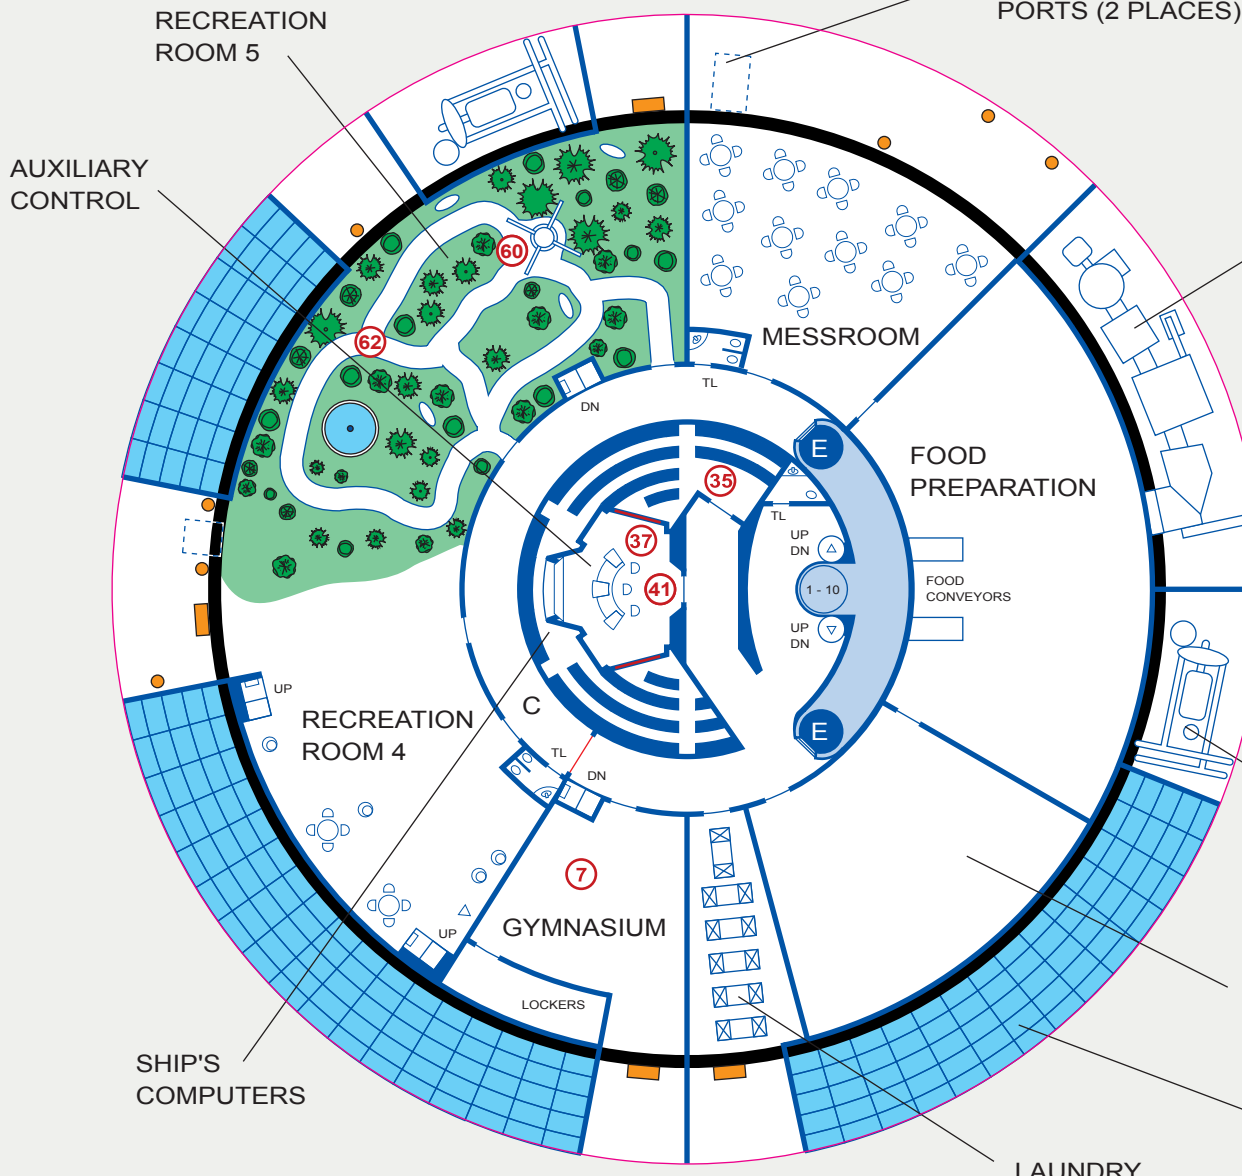

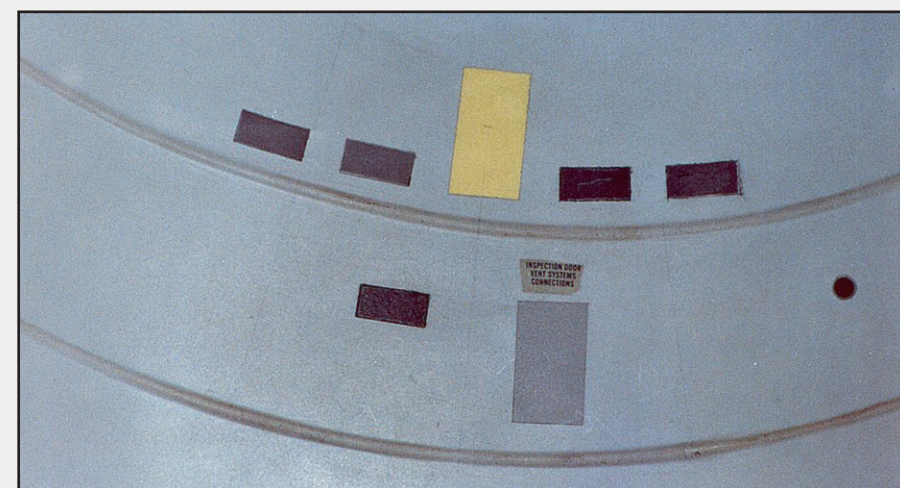

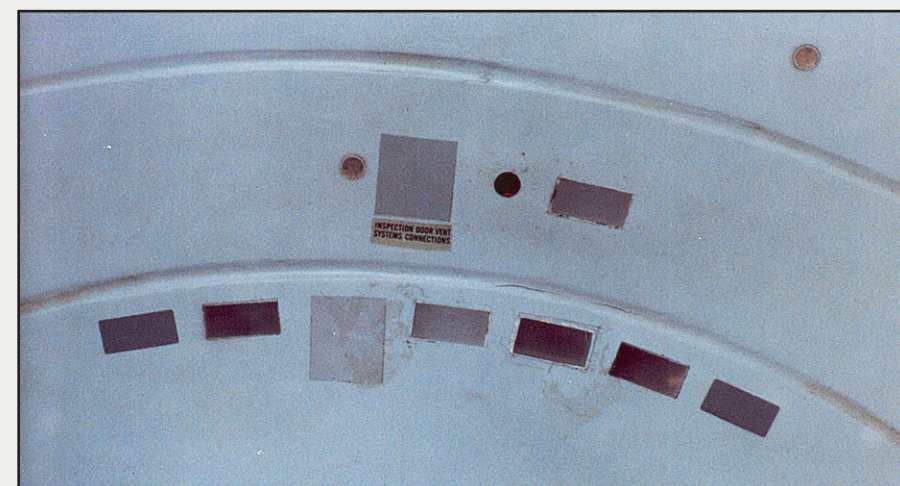

There are four hatches or ports on the studio model. Two of them are on Deck 8. The other two are on Deck 9. Images of these hatches are below, left. Their distribution around them. The hull is at such an extreme angle that even the longest hatch results in an opening only 4 feet (1.2 meters) tall. A crew member in a spacesuit can not fit through any of these hatches. Instead, these 2 hatches probably have a function similar to the Umbilical Connection Panels as seen on the Space Shuttle (below, right).

**DECK 9**  
TMoST states that Material Reclamation and Fabrication is located on this deck. This process is probably not 100% efficient. Therefore, these 2 hatches could allow for transfer of rare elements required in various manufacturing processes.

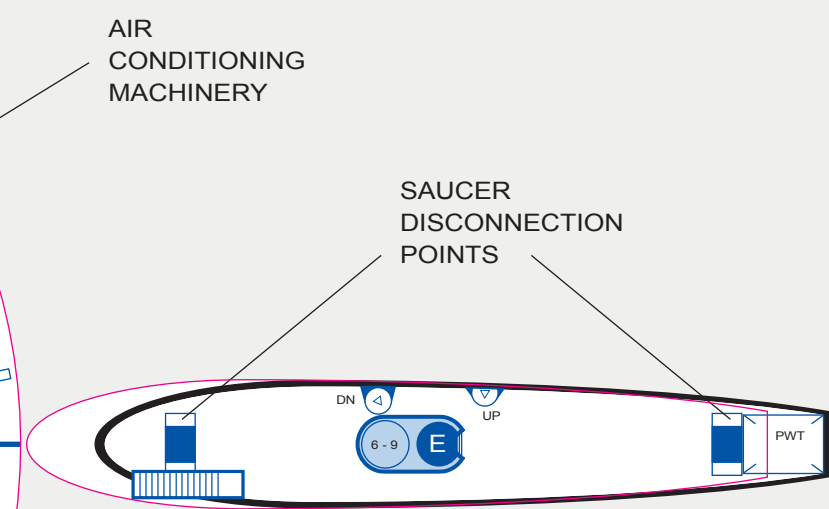

**REAR LANDING LEG**  
This is located between Dorsal Deck 8 and Dorsal Deck 9.

**DECK 8 DORSAL and DECK 9 DORSAL**  
The disconnection equipment is located on these two decks. This area is kept clear and is difficult to enter except by authorized personnel. It is accessible only by ladder and by Jefferies Tube.

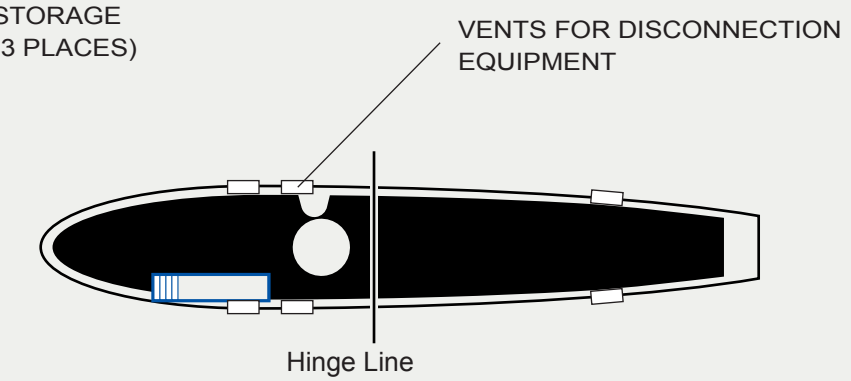

DECK 9 DORSAL is also called "DECK 1 (Secondary Hull)" because this re-numbering reflects the Secondary Hull's ability to operate independently.

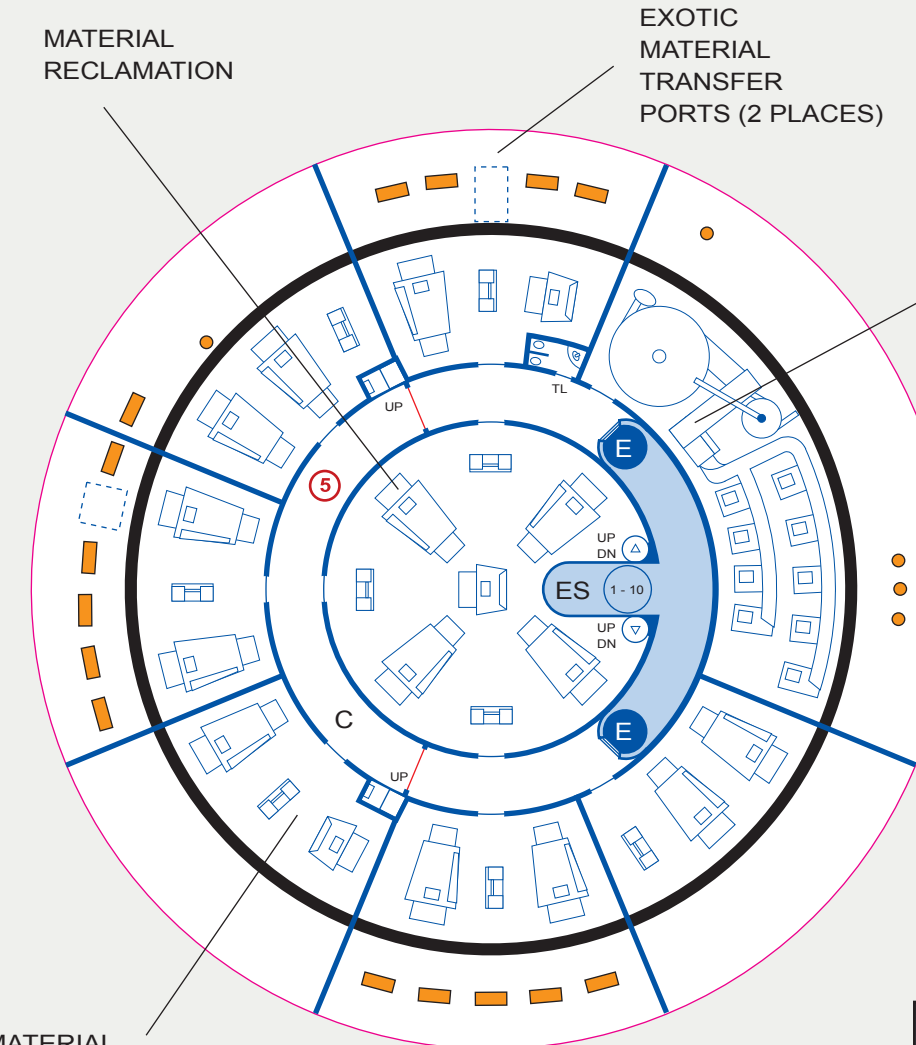

**DECK 8: ENTERTAINMENT / RECREATION FACILITIES**

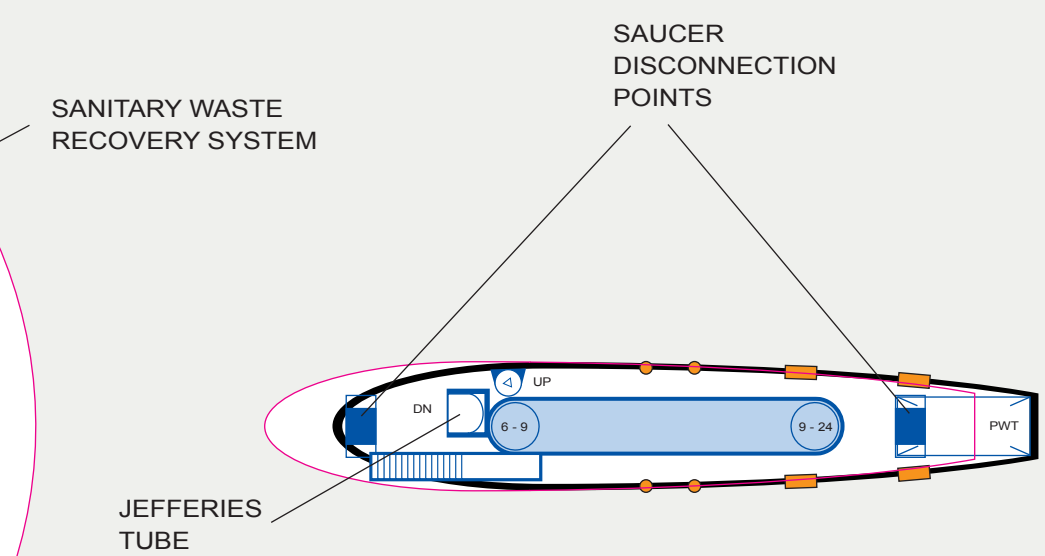

**DECK 8: DORSAL**

**REAR LANDING LEG**

**DECK 9: FABRICATION FACILITIES**

**DECK 9: DORSAL  
DECK 1 (Secondary Hull)**
