

If printed 17 inches tall (from black-outlined edge to black-outlined edge) the scale of these drawings is 1/350.

NOTES

DECK 9

Most of this deck is unchanged from the original configuration of the Constitution-class ship. Material Reclamation and Fabrication is probably not a 100% efficient process. Therefore, these 2 hatches could allow for transfer of rare elements required in various manufacturing processes.

Deflector Equipment is located in the center of the deck.

DECK 10

TMoST mentions Photon Torpedoes but not their location. Photon Torpedoes were shown in various episodes of STAR TREK to emanate from the underside of the Primary Hull, approximately the same

DECK 10 (continued)

place as the Phasers. Since TMoST states Phaser Banks are on Deck 11, the logical spot for Photon Torpedoes and their launch system is on Deck 10.

The rest of the deck is filled with Cargo Holds.

The Deflector Equipment located in the center of the deck works with the Deflector Equipment and Space Energy Field Sensors located in the bow of Deck 6 and Deck 7 and with the Main Sensor Dish.

DECK 9: FABRICATION FACILITIES

DECK 10: PHOTON TORPEDO LAUNCHERS / CARGO
