NOTES

DECK 5
The layout of the forward half of this deck is very similar to the FJ design for the Constitution-class ship. I adjusted the turbo-elevator shafts so that they are now exactly 120° apart. There is also one turbo-elevator storage space.

The forward arc of the outermost ring (around the Officers' Quarters) contains Batteries, Air Conditioning, Water Pumps, Circuit Breakers, etc. and the three upper Phaser Banks. There are 6 corridors providing access, plus interconnecting doors.

In the center are 3 relaxation areas. The one at the front is a Lounge with doors for privacy. The other two are Messrooms, serviced by food dispensers which are directly connected to the Food Preparation area on Deck 8.

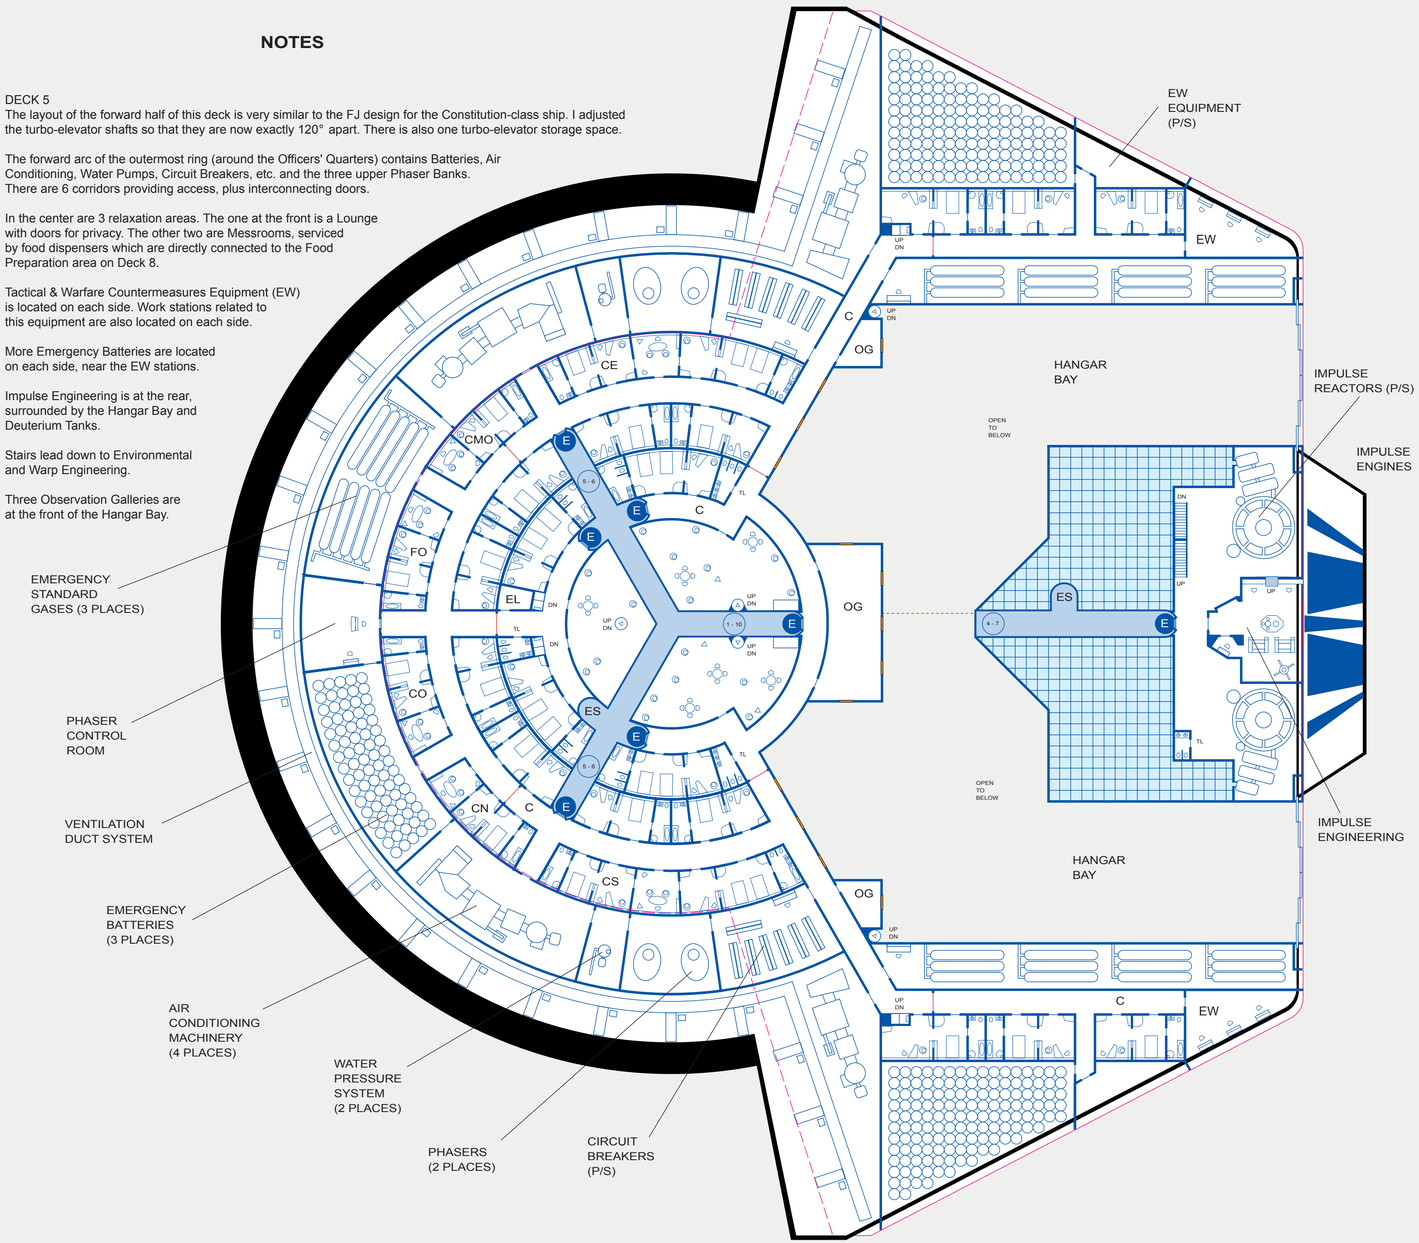
Tactical & Warfare Countermeasures Equipment (EW) is located on each side. Work stations related to this equipment are also located on each side.

More Emergency Batteries are located on each side, near the EW stations.

Impulse Engineering is at the rear, surrounded by the Hangar Bay and Deuterium Tanks.

Stairs lead down to Environmental and Warp Engineering.

Three Observation Galleries are at the front of the Hangar Bay.



DECK 5: SENIOR OFFICERS' QUARTERS
