

DECK 12: LOWER SENSOR DOME

DECK 12: VENTRAL

DECK 16: VENTRAL

NOTES

DECK 12

The Lower Sensor Dome feeds data directly to the various science laboratories on Deck 2 (just like the upper sensor dome). That data is then relayed to the various command stations on Deck 3 around the Bridge.

The 3 Tractor Beam Controllers direct the Emitter so that the beam can locate and lock onto the object being towed.

DECK 12 VENTRAL

The distance between Deck 12 and Deck 12 Ventral shown here is an accurate representation of their locations with respect to each other. This is a Lounge.

DECK 13 VENTRAL

This is a Lounge.

DECK 14 VENTRAL

This is a Lounge.

DECK 15 VENTRAL

Space Energy Field Sensors are located on this deck.

DECK 16 VENTRAL

Deflector Equipment is located on this deck.

DECK 17 VENTRAL

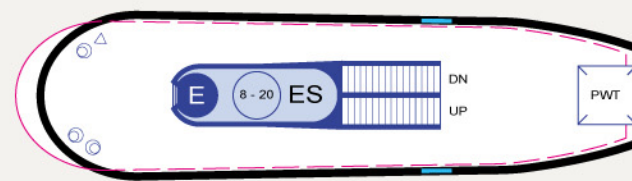

More Deflector Equipment is located on this deck.

DECK 18 VENTRAL

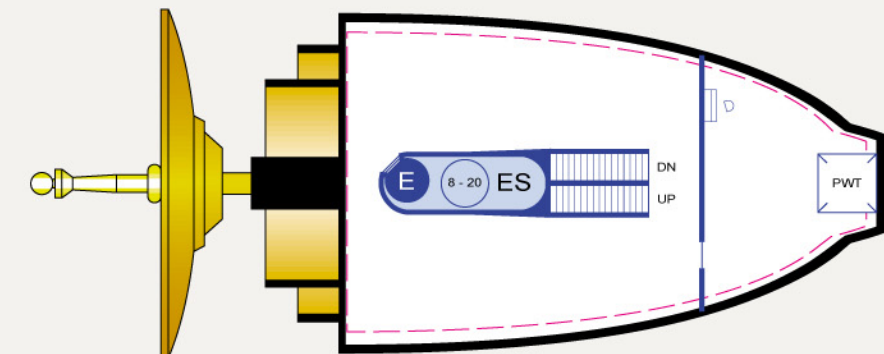

Even more Deflector Equipment is located on this deck.

DECK 19 VENTRAL

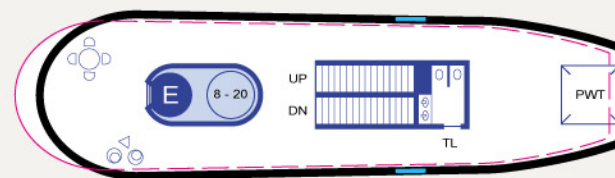

The last of the Deflector Equipment is located on this deck.
