NOTES

EARLY WARNING or ELECTRONIC WARFARE (EW) Pod - at right

This pod has only ever been seen on Light Cruisers of this class. Not much is known about the basic configuration or internal details, despite repeated requests for information.

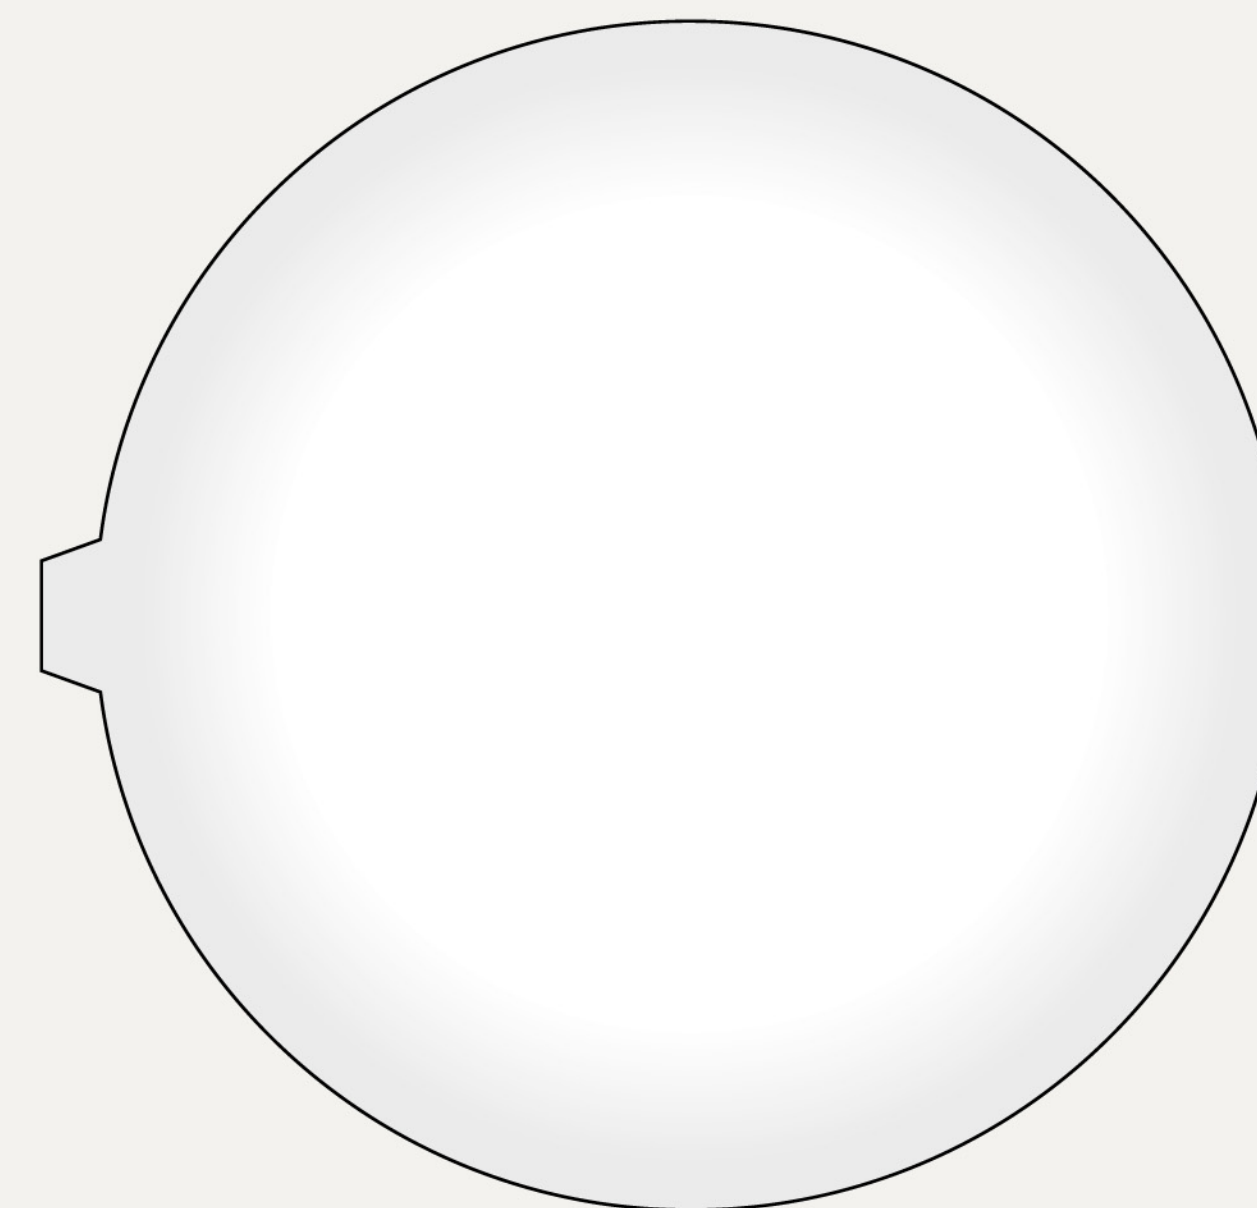

WEAPONS Pod - below

This pod was originally developed for the AVENGER-Class Heavy Frigate.

Many other pods are available. Custom configurations are also possible. For more information, contact STARFLEET Headquarters, San Francisco, Earth.

GENERAL NOTES

Are the wide steps in Engineering considered to be "stairs"? Are the steps on the Bridge considered to be "stairs"? Perhaps stairs do not appear in any episodes, but that does not mean they do not exist in Starfleet ships. Therefore:

1. The two Cargo Operations areas on Deck 7 have wide stairs as well as cargo lifts.
3. Stairs lead from Engineering on Deck 7 down to Deck 10.
4. Stairs allow for a quick connection between the crew quarters on Deck 5, Deck 6, and Deck 7. From deck 7 stairs also lead to the main Recreation area on Deck 8.

Aside from these stairs, the rectangular ladders (within rectangular alcoves) and the triangular ladders (within circular alcoves) supplement the turbo-elevator system. If that system fails, or in some other emergency, ladders alone would not be very efficient; it is easier to carry something up stairs than up a ladder.

There are external features that do not need to be marked: hatches for the Phasers, hatches for the Photon Torpedo Launchers, and the Primary Hull / Warp Engine disconnection line, to name a few. These drawings attempt to make sense of the markings that ARE visible on the studio model of the ENTERPRISE, all of which are then extrapolated onto this ship.

More notes relevant to each deck appear on the following pages.

Contradictions and errors exist within the episodes. I am sure 100% continuity is not possible.

I hope these pages provide you with some pleasure, information, and ideas for contemplation / consideration.

If I missed something, please let me know.
