

NOTES

- DECK 19
The soil for the Natural Habitat occupies the forward half of the deck.
- More Manufacturing Stations are located on this level. Cargo Holds fill the rear half of the deck. The Cargo Lifts continue through this deck.
- The Cargo Operations Center is located at the aft of this deck, with Equipment Bays located on either side of it. These Bays are even big enough to hold a Work Bee.
- A branch of the Turbo-elevator system reaches up to this deck from Deck 22.
- Aft of the Docking Port is the Interconnecting Boom which leads to a Cargo Pod (as shown here). However, a connection can be made with many other ships or pieces of equipment. See the Bonus Page for more information.

DECK 19: CARGO / CARGO OPERATIONS
