DECK 26R: EXECUTIVE SUITES

NOTES

DECK 21R
The Beacon for the Red Cone is here . . . and not much else.

DECK 22R
These Sensors feed data directly to the Command Center.

DECK 23R
The uppermost level of Executive Suites contains two single units.

DECK 24R
This level of Executive Suites contains two single units.

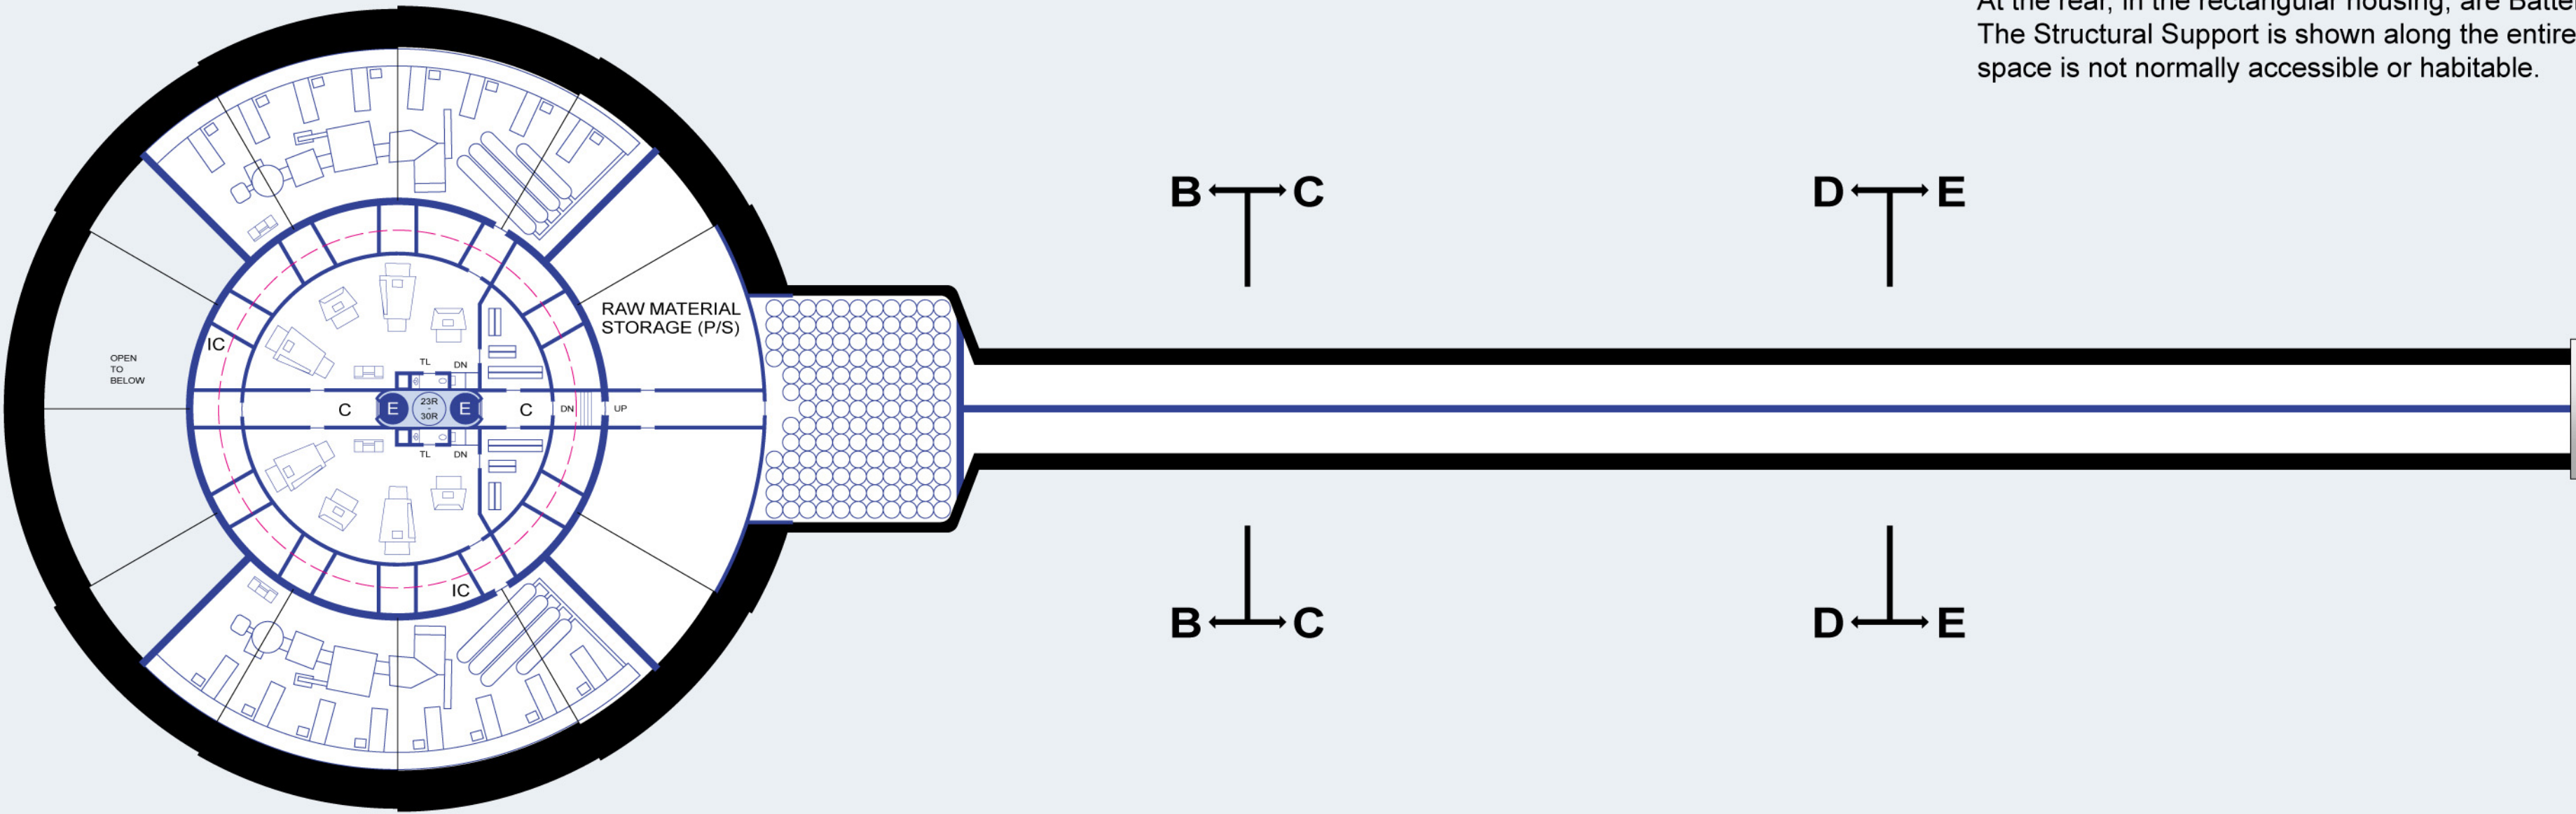

DECK 25R
This level of Executive Suites contains two double units and one single unit.

DECK 26R
This level of Executive Suites contains four double units.

DECK 27R
The front of this deck is open to the Swimming Pool (below).
Atmosphere Control is on each side of this deck.
At the rear of this deck is Raw Material Storage. This is mostly for small manufacturing projects which are managed by the Fabrication Facilities located in the middle of the deck.

Around the Fabrication Facilities are the Clamshell Structural Support Beams, located in the ring-shaped Inspection Corridor. Within this corridor was the automated machinery for deploying the clamshell; that machinery has since been removed and re-purposed.

A small Circuit Panel Room is aft of the Fabrication Facilities.
At the rear, in the rectangular housing, are Batteries.
The Structural Support is shown along the entire length of the arm, but this space is not normally accessible or habitable.

DECK 27R: AIR CONDITIONING / BATTERIES
