DECK 26Y: EXECUTIVE SUITES

NOTES

DECK 21Y
The Beacon for the Yellow Cone is here . . . and not much else.

DECK 22Y
These Sensors feed data directly to the Command Center.

DECK 23Y
The uppermost level of Executive Suites contains two single units.

DECK 24Y
This level of Executive Suites contains two single units.

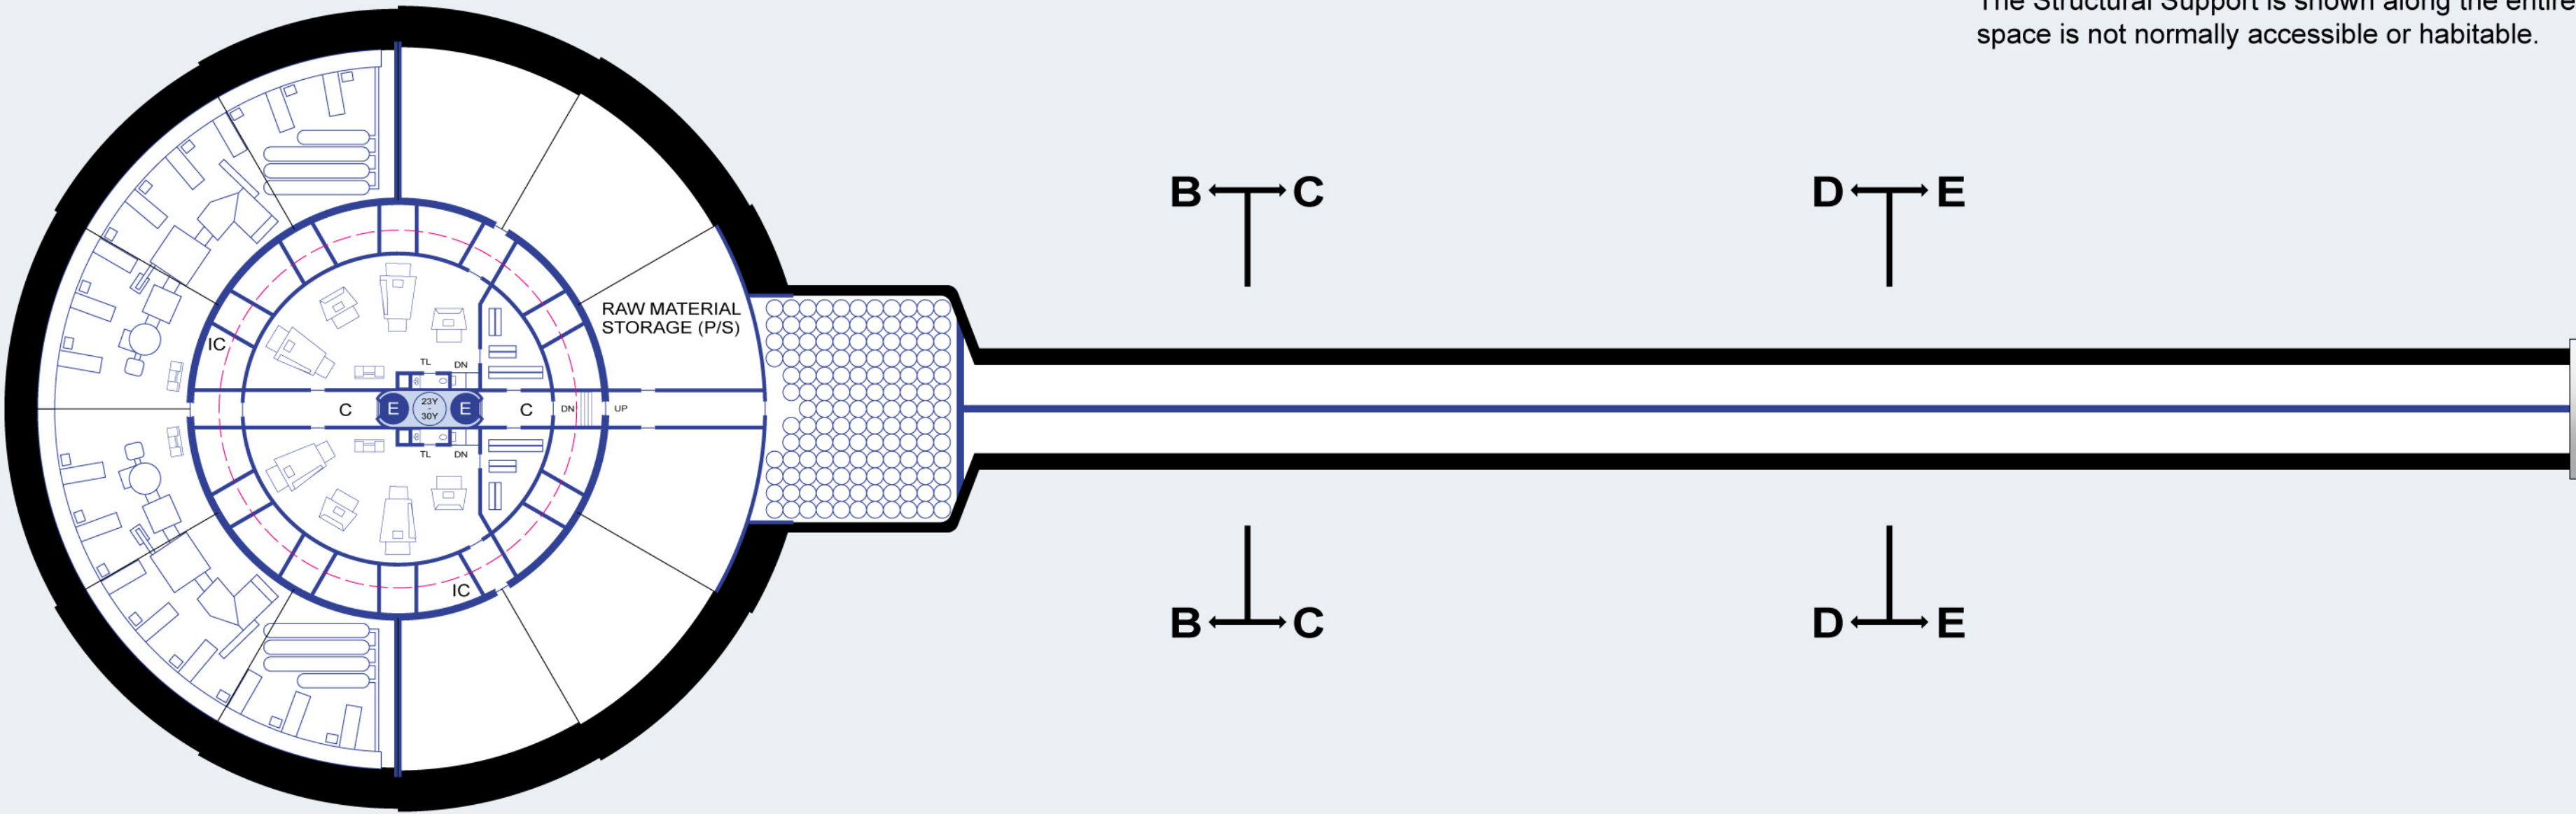

DECK 25Y
This level of Executive Suites contains two double units and one single unit.

DECK 26Y
This level of Executive Suites contains four double units.

DECK 27Y
Atmosphere Control is in the front half of this deck.
The rear half this deck is Raw Material Storage. This is mostly for small manufacturing projects which are managed by the Fabrication Facilities located in the middle of the deck.

Around the Fabrication Facilities are the Clamshell Structural Support Beams, located in the ring-shaped Inspection Corridor. Within this corridor was the automated machinery for deploying the clamshell; that machinery has since been removed and re-purposed.

A small Circuit Panel Room is aft of the Fabrication Facilities.
At the rear, in the rectangular housing, are Batteries.
The Structural Support is shown along the entire length of the arm, but this space is not normally accessible or habitable.

DECK 27Y: AIR CONDITIONING / BATTERIES
