

If printed 28 inches wide (from black-outlined edge to black-outlined edge) the scale of these drawings is 1/350.

NOTES

DECK 9
As above, the Administrative Offices continue here. Each one is slightly larger than those located on the deck above.
Again, there are 2 Storage Rooms located here.

DECK 10
More Administrative Offices are located here, as well as 2 Storage Rooms and 1 Briefing Room.

DECK 11
The Administrative Offices continue on this deck, but they are surrounded by a ring corridor. In other words, they do not have their own windows looking out into the emptiness of space.

DECK 12
The last deck of Administrative Offices are located here. As above, they are surrounded by a ring corridor.

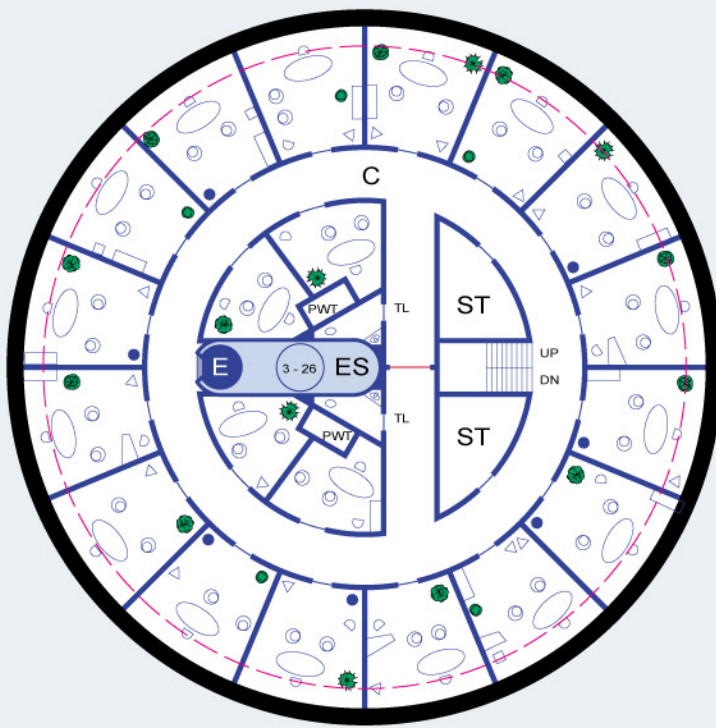

DECK 13
This entire deck is devoted to Sickbay, the Convalescent Ward, and various doctors' offices.
The single Turbo-elevator shaft splits into 3 shafts on this deck.
The stairs leading down from previous decks stop here, but a new set of stairs start on the other side (the "front") of the deck; they reach down to Deck 18.

DECK 14
The K-Series Space Stations are Manufacturing and Cargo centers. There are 4 types of material fabricators: Food, Organic, Metallic, and Non-metallic.
All of these can occur on the space station.
Some areas are designated as Cargo, or Storage, or Raw Material Storage, but the process is cyclic. Material arrives, it is stored, items are fabricated, they are stored, and finally they are shipped. Very little material is wasted on these Space Stations.

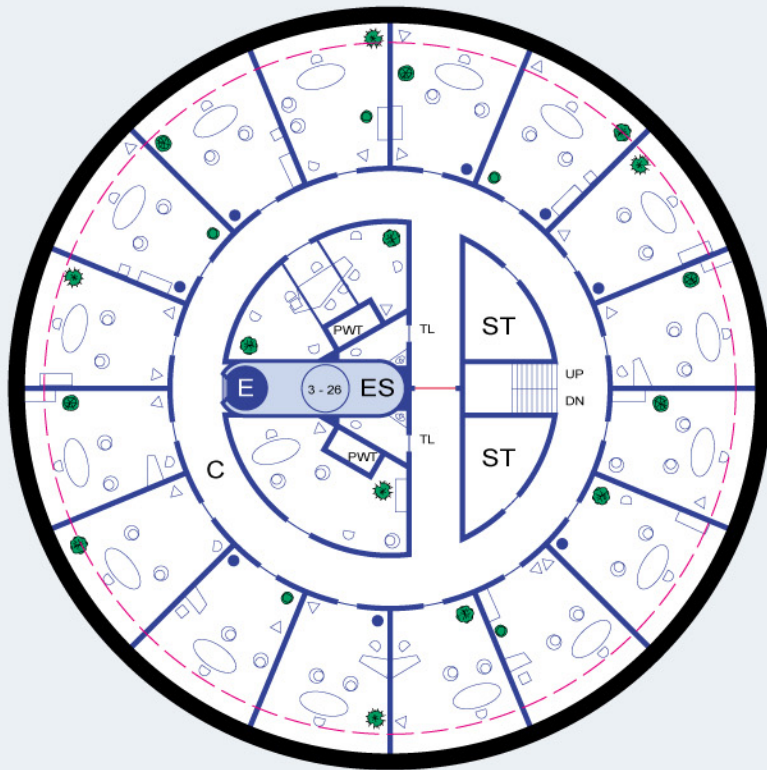

This deck contains the first of the many Cargo Holds. Cargo Lifts reach from this deck down to Deck 23.

Around the Cargo Holds is a ring-shaped Inspection Corridor. It is 2 decks tall and is not accessible from this Deck.

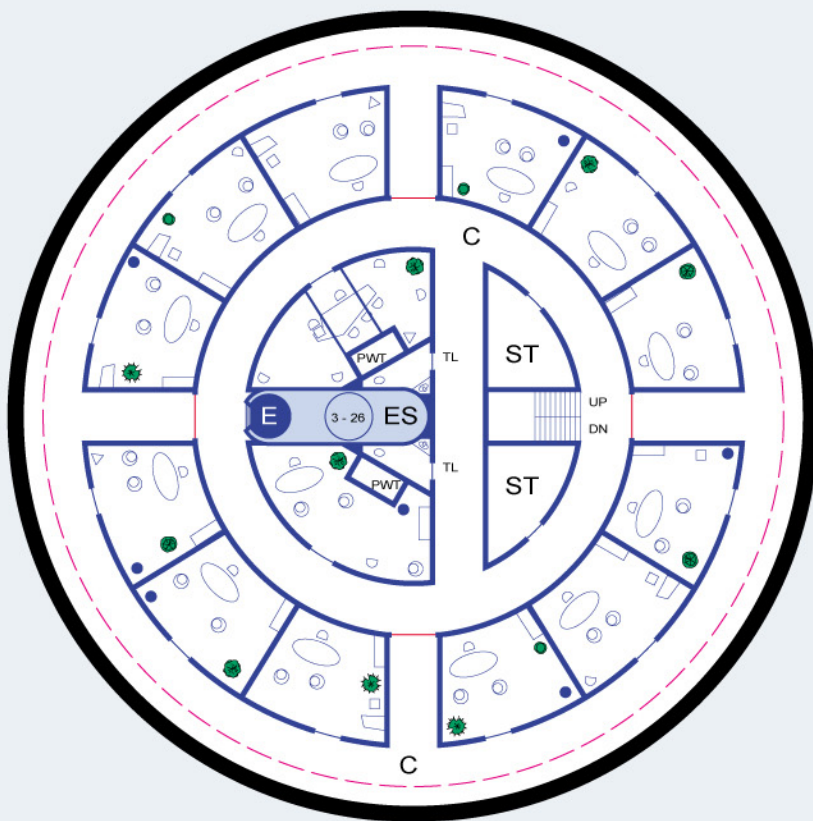

The large rectangular extension at the rear of the Main Hull starts on this deck.
