

If printed 17 inches tall (from black-outlined edge to black-outlined edge) the scale of these drawings is 1/350.

NOTES

DECK 9

Most of this deck is unchanged from the original configuration of the Constitution-class ship. Material Reclamation and Fabrication is probably not a 100% efficient process. Therefore, these 2 hatches could allow for transfer of rare elements required in various manufacturing processes.

DECK 10 (alternate)

TMoST mentions Photon Torpedoes but not their location. Photon Torpedoes were shown in various episodes of STAR TREK to emanate from the underside of the Primary Hull, approximately the same place as the Phasers. Since TMoST states Phaser Banks are on Deck 11, the logical spot for Photon Torpedoes and their launch system is on Deck 10.

On some ships of this class, rearward-firing Torpedo Launchers have also been installed by removing some of the Cargo Holds.

A few Cargo Holds remain, but most of the space is used for Torpedo storage.

DECK 9: FABRICATION FACILITIES

DECK 10: PHOTON TORPEDO LAUNCHERS (4) / CARGO
