

**NOTES**

**DECK 4**

The stairs for evacuating the crew after an emergency landing via the hatch on Deck 2 start on this deck. Around, behind, and beneath these stairs is a storage space (EL).

TMoST mentions that Water Storage is on Deck 7. Of course, water can be placed there too, but the shallow space around this deck lends itself well to this function.

About half of the Primary Hull was removed for this class. The number of crew members is lower, so less water is needed, and fewer water pumps are needed.

A smaller ship resulted in a surplus of power, so more Phasers were installed.

**DECK 4 (continued)**

Most of the Crew's Quarters in the Primary Hull are laid out in rings. The rings are labeled from the center outwards, starting with A, then B, then C, and so on.

TMoST mentions Junior Officers have quarters on Deck 4. There are sufficient accommodations in the Primary Hull for the crew complement of this type of Destroyer. Crew members do not have to share quarters with anyone else.

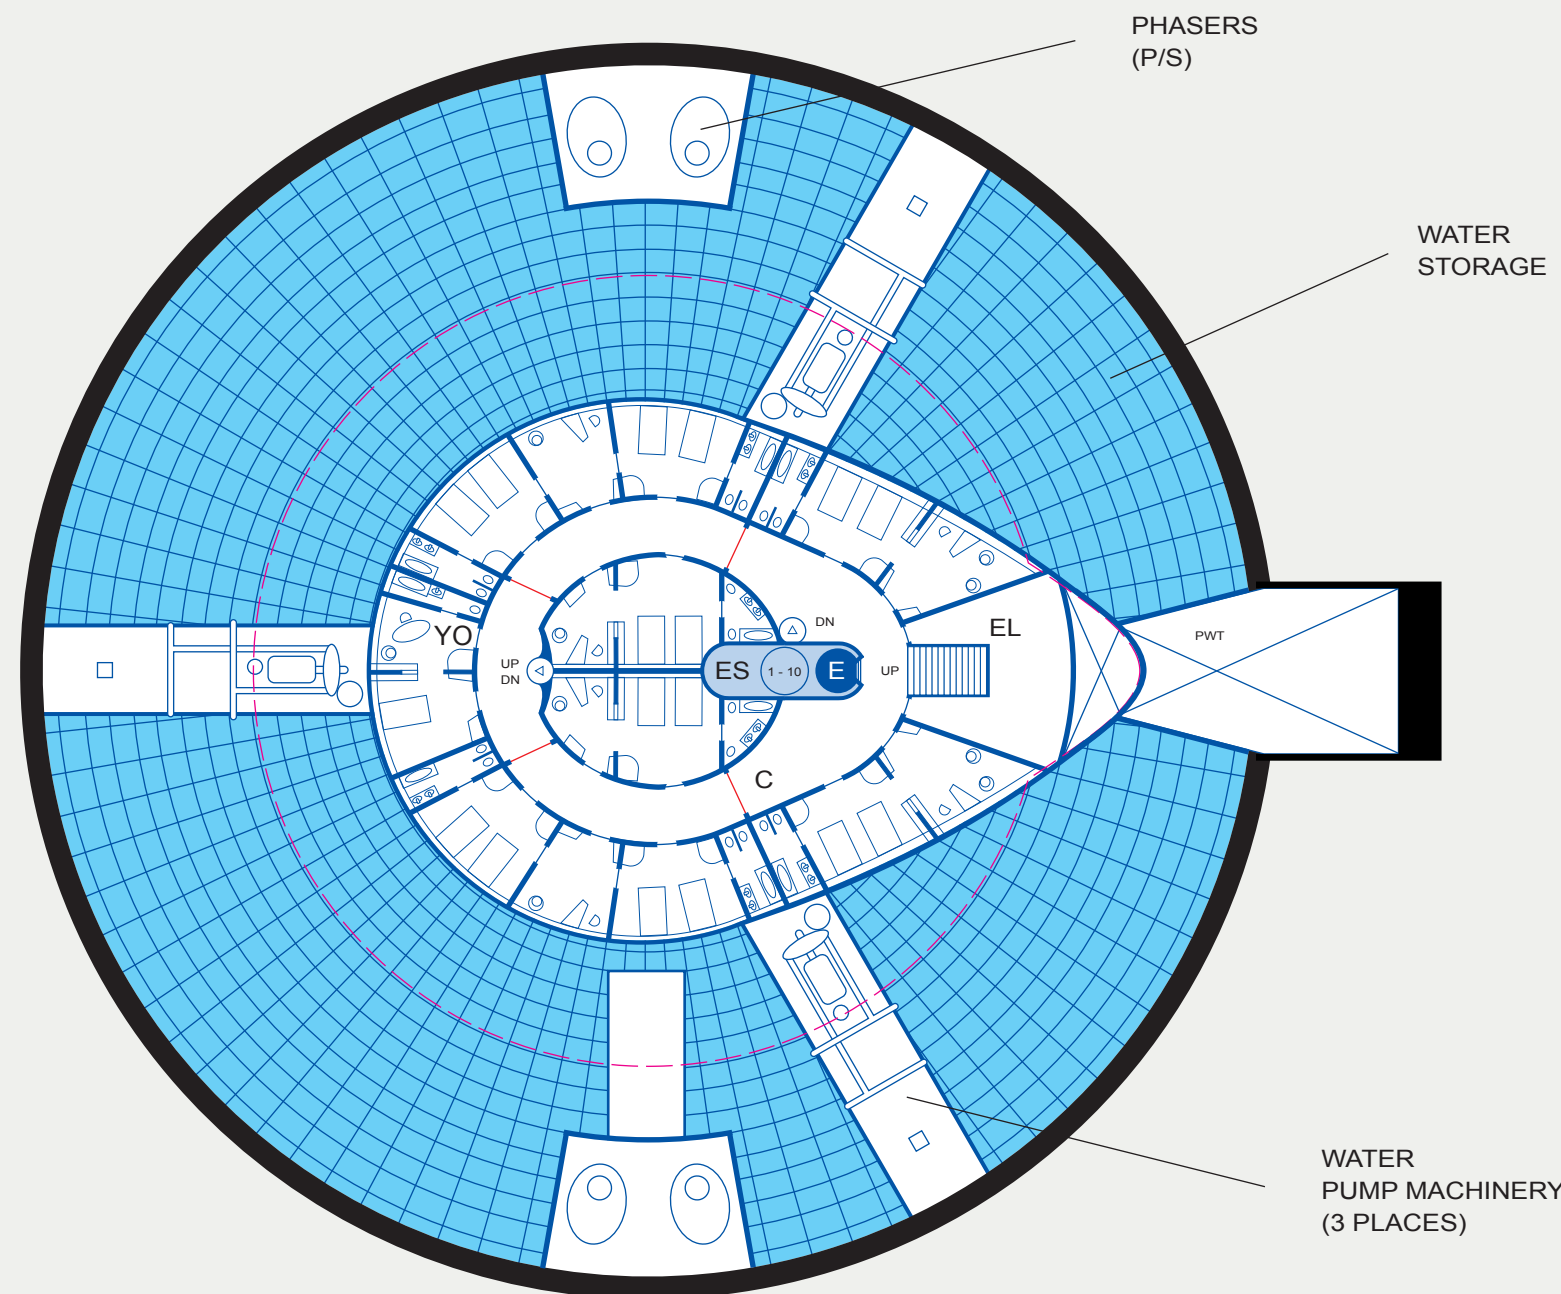

The Piping / Wiring Trunk has been enlarged and enclosed. This was done in preparation for the proposed (new) Impulse Deflection Crystal configuration. This was under development for installation in the next generation of starships.

**DECK 4: JUNIOR OFFICERS' QUARTERS**

In JOURNEY TO BABEL, over 100 diplomats were transported by the U.S.S. ENTERPRISE. In THIS SIDE OF PARADISE, over 150 colonists were transported off-planet by the ship.

Gene Roddenberry imagined a higher standard of living for everyone, even enlisted crew members. There are more than enough rooms and beds on the ship to accommodate diplomats, colonists, etc. It would only be in such situations that crew members might be asked to share quarters.
