

If printed 17 inches tall (from black-outlined edge to black-outlined edge) the scale of these drawings is 1/350.

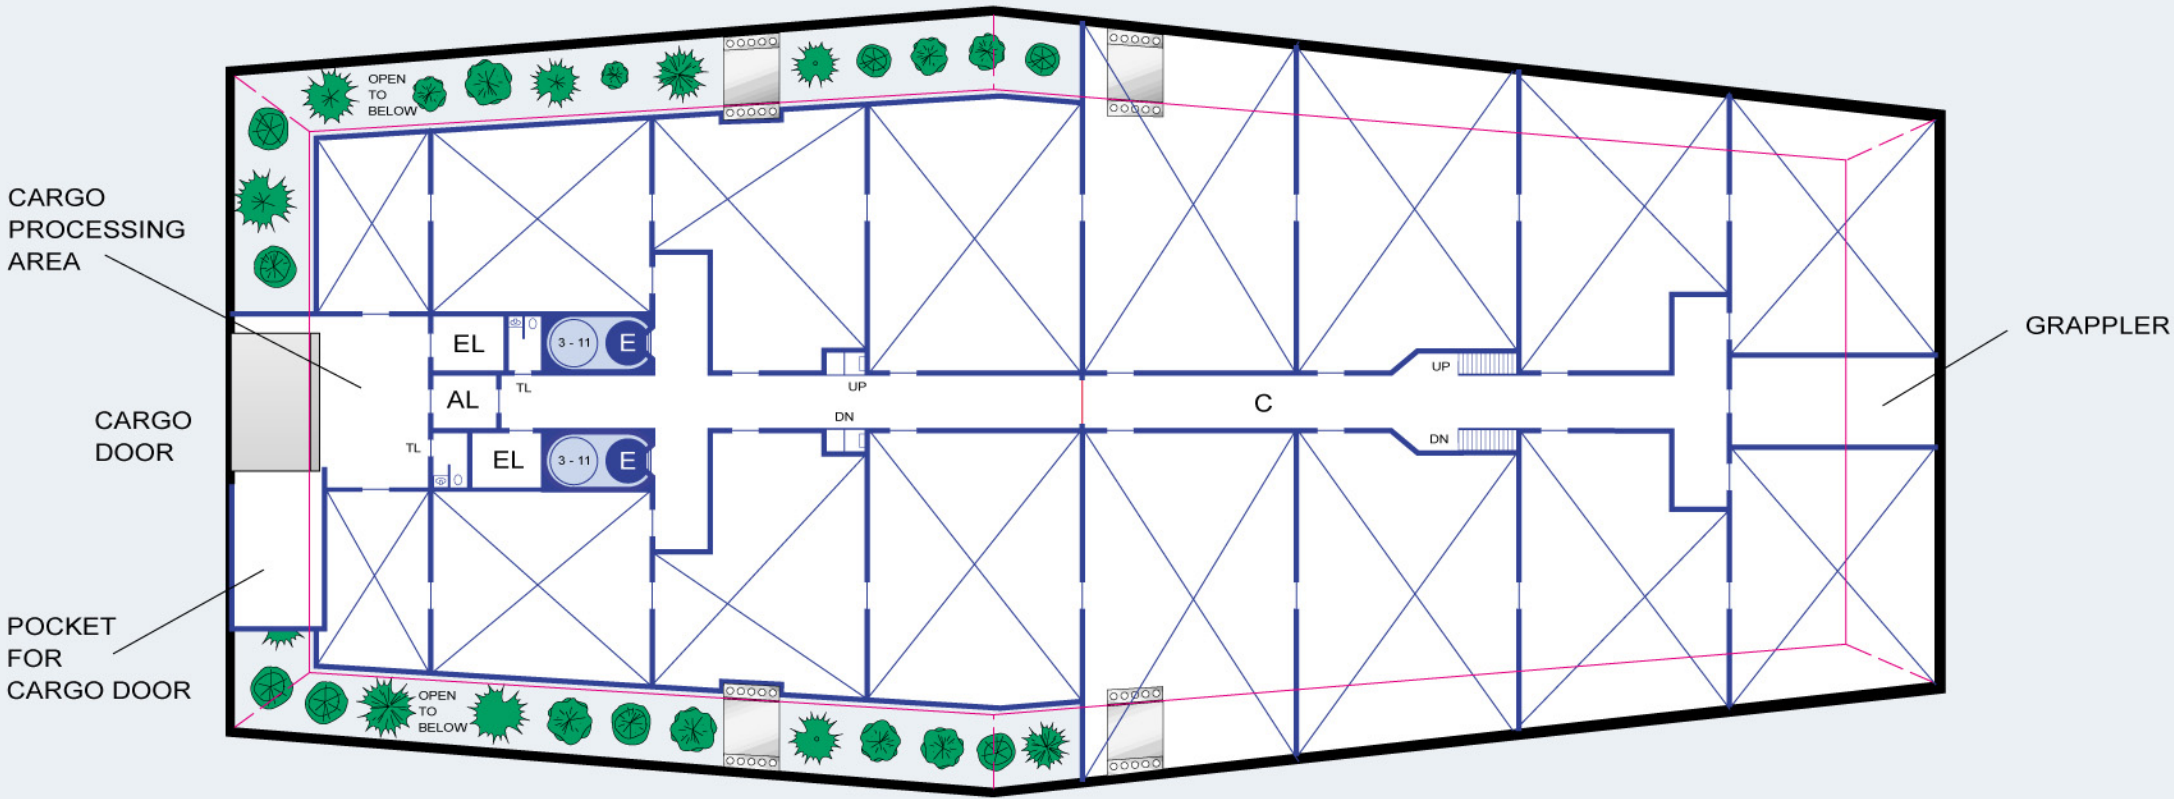

NOTES

DECK 4
The main Cargo Bay Door is on Deck 16 at the rear, but some smaller items can be loaded into the ship from the Cargo Door located at the front of this deck. The Airlock isolates the Cargo Processing Area from the rest of the ship, if required.

The highbay for the Park is located around the perimeter of the front half of this deck. This highbay allows some trees in the Park (on Deck 5) to grow taller than the standard 8-foot (2.4-meter) ceilings. This highbay contributes to better air circulation.

The Cargo Holds extend all the way to the rear.

At the rear in the middle is the Grappler for retrieving Shuttlecraft. The Tractor Beam has not been developed yet to perform this function.

DECK 4: CARGO
