

NOTES

DECK 7
Water Storage continues on this deck.

The Bridge is surrounded by the Water Storage. Just ahead of the Bridge are Briefing Rooms.

The corridor at the front is one of two that lead to the Command Module. The other corridor is on Deck 10.

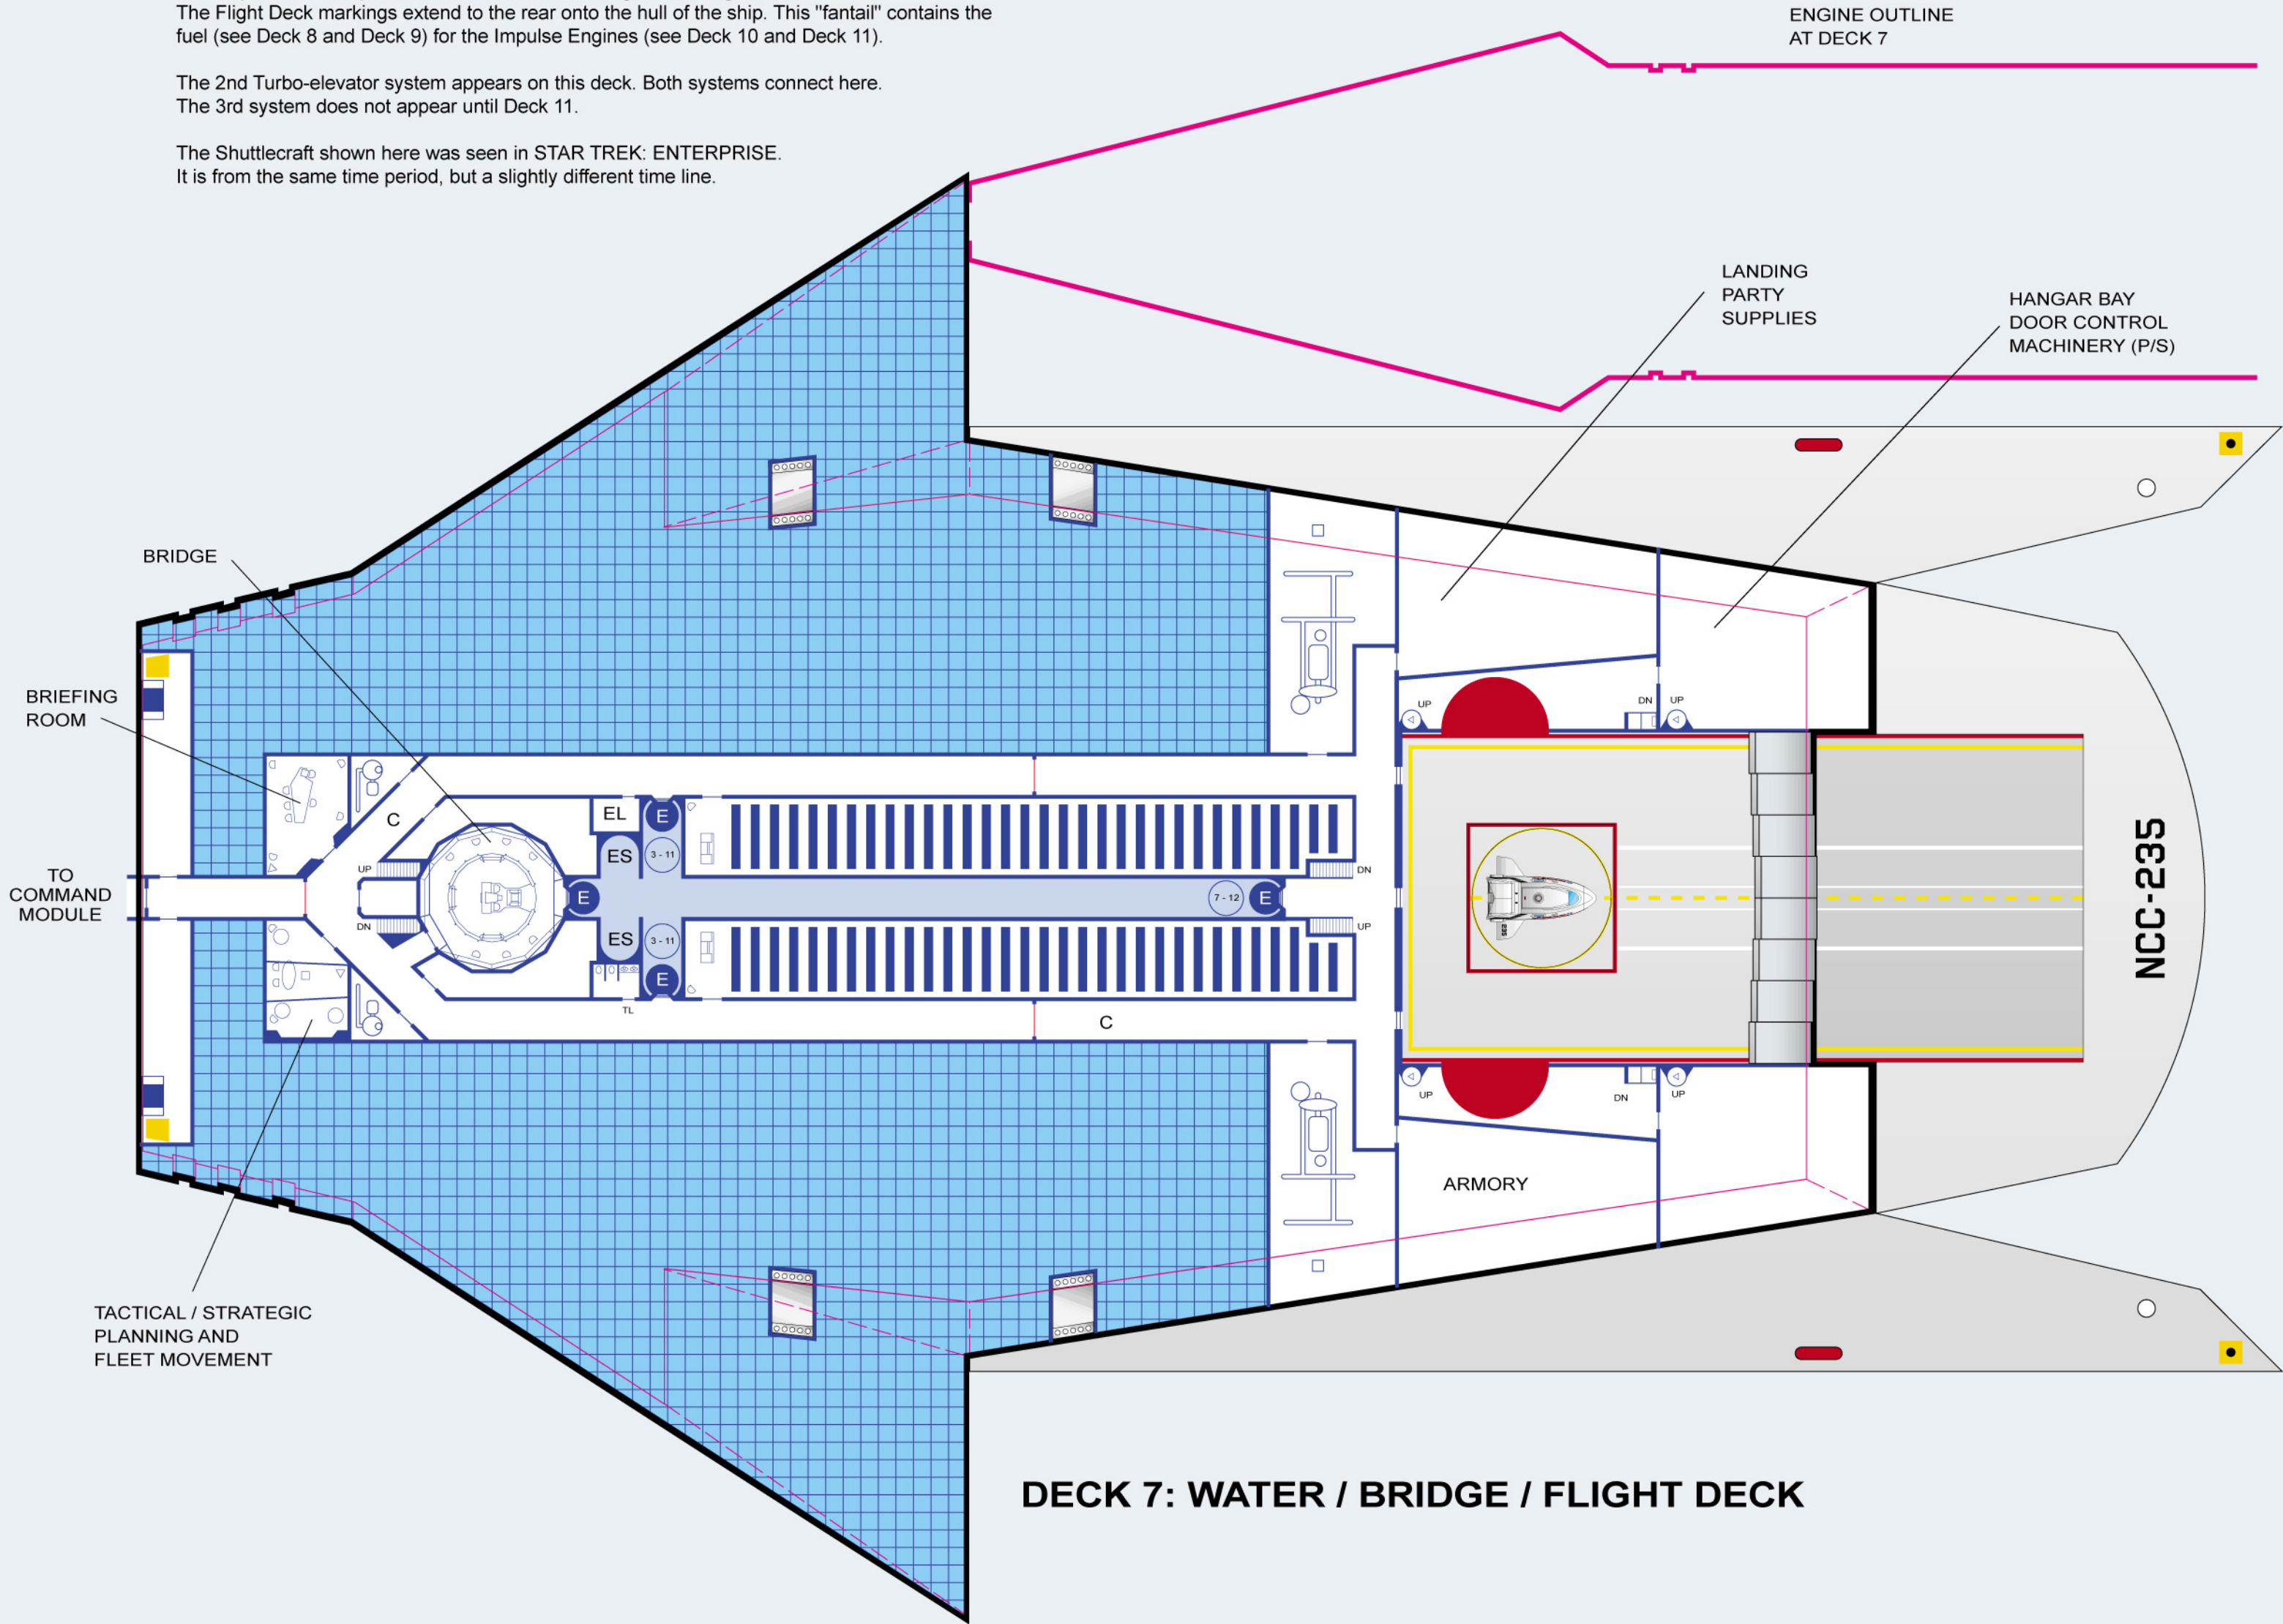

The ship's Main Computers extend aft from the Bridge to the Flight Deck.
The Flight Deck markings extend to the rear onto the hull of the ship. This "fantail" contains the fuel (see Deck 8 and Deck 9) for the Impulse Engines (see Deck 10 and Deck 11).

The 2nd Turbo-elevator system appears on this deck. Both systems connect here.
The 3rd system does not appear until Deck 11.

The Shuttlecraft shown here was seen in STAR TREK: ENTERPRISE.
It is from the same time period, but a slightly different time line.

DECK 7 (continued)
To starboard of the Flight Deck is the preparation area for Landing Parties. To port is the Armory.

At the extreme aft are the "pockets" into which the Hangar Bay doors retract, as well as Hangar Bay Door Control Machinery.

DECK 7: WATER / BRIDGE / FLIGHT DECK
