

NOTES

DECK 8
Water Storage continues on this deck.

Weapon Turrets are located fore and aft of the Water Storage but can only be accessed from Deck 9.

The forward half of this deck contains the main Hydroponics Bay. Feeding a crew of 157 during a 6-year long mission requires A LOT of food. Food is grown here, and then stored on the starboard side at the rear. There are two Cold Storage areas in the center for longer-term preservation.

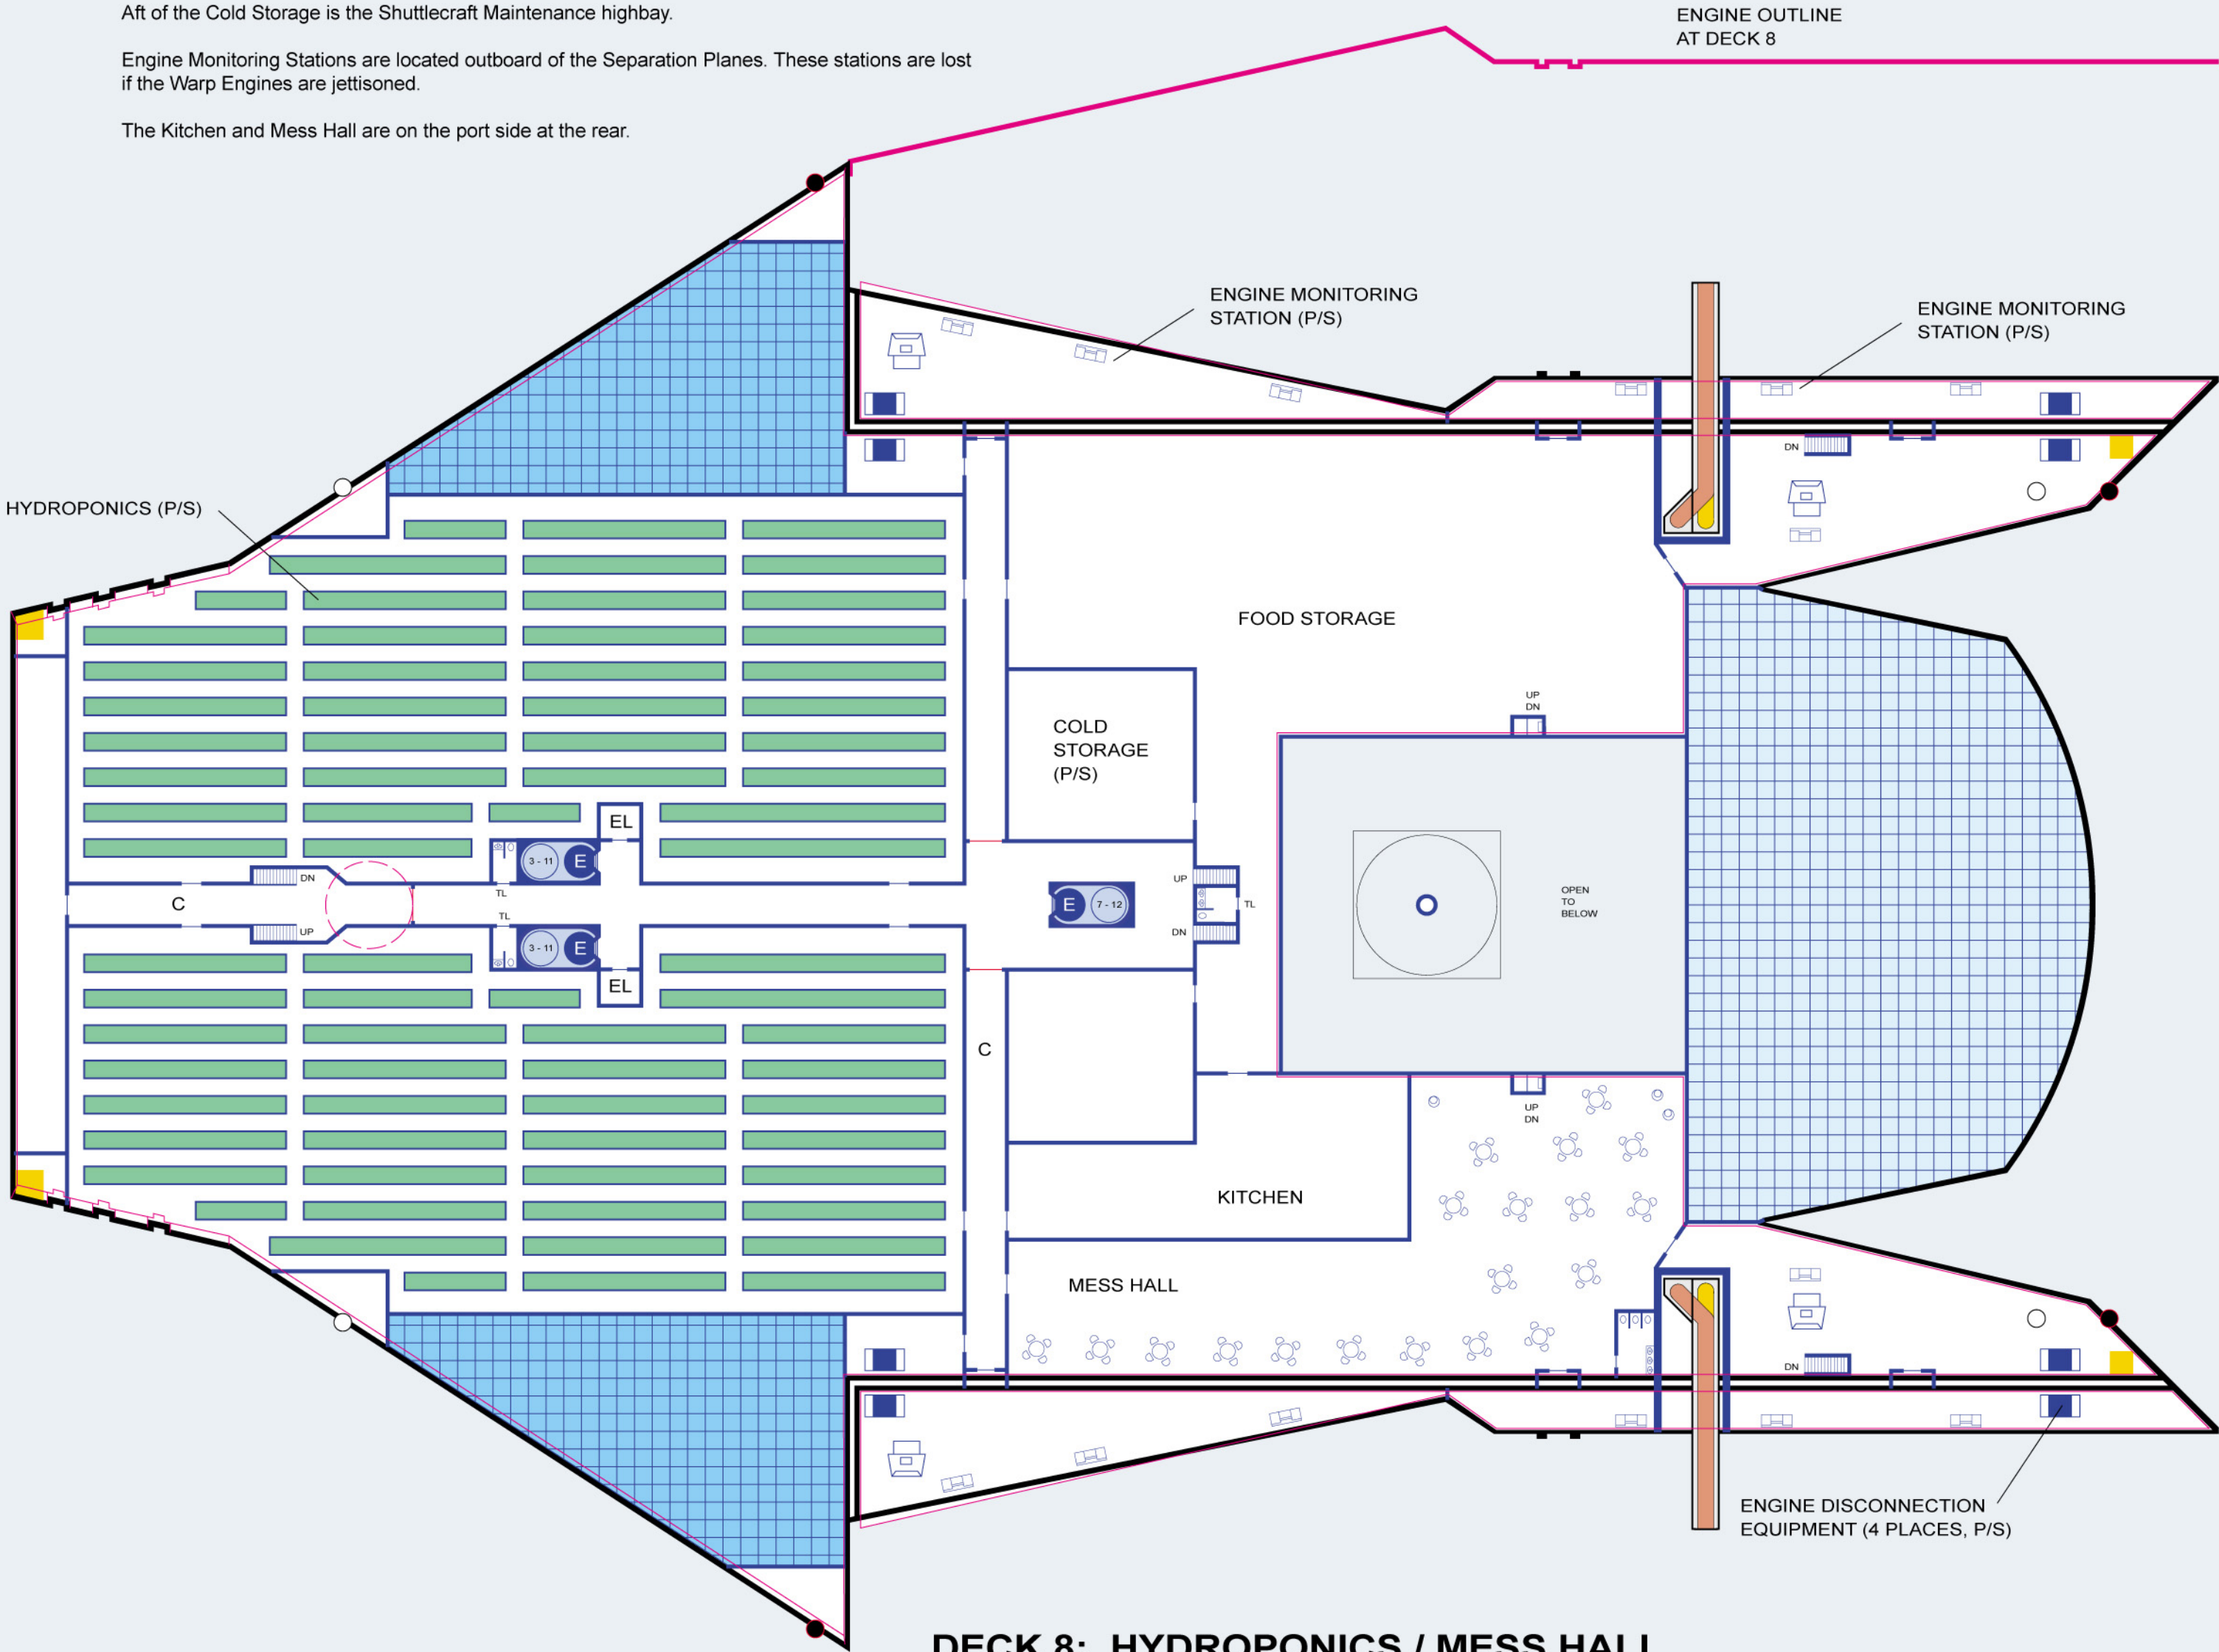

Aft of the Cold Storage is the Shuttlecraft Maintenance highbay.

Engine Monitoring Stations are located outboard of the Separation Planes. These stations are lost if the Warp Engines are jettisoned.

The Kitchen and Mess Hall are on the port side at the rear.

DECK 8 (continued)
At the extreme aft in the "fantail" is the fuel for the Impulse Engines. This fuel is also used for the Shuttlecraft and can be accessed from the Maintenance Bay.

To port and starboard of the fantail are more Weapon Turrets. They extend down to Deck 9 but can only be accessed from Deck 8.

DECK 8: HYDROPONICS / MESS HALL
