

If printed 17 inches tall (from black-outlined edge to black-outlined edge) the scale of these drawings is 1/350.

NOTES

DECK 16

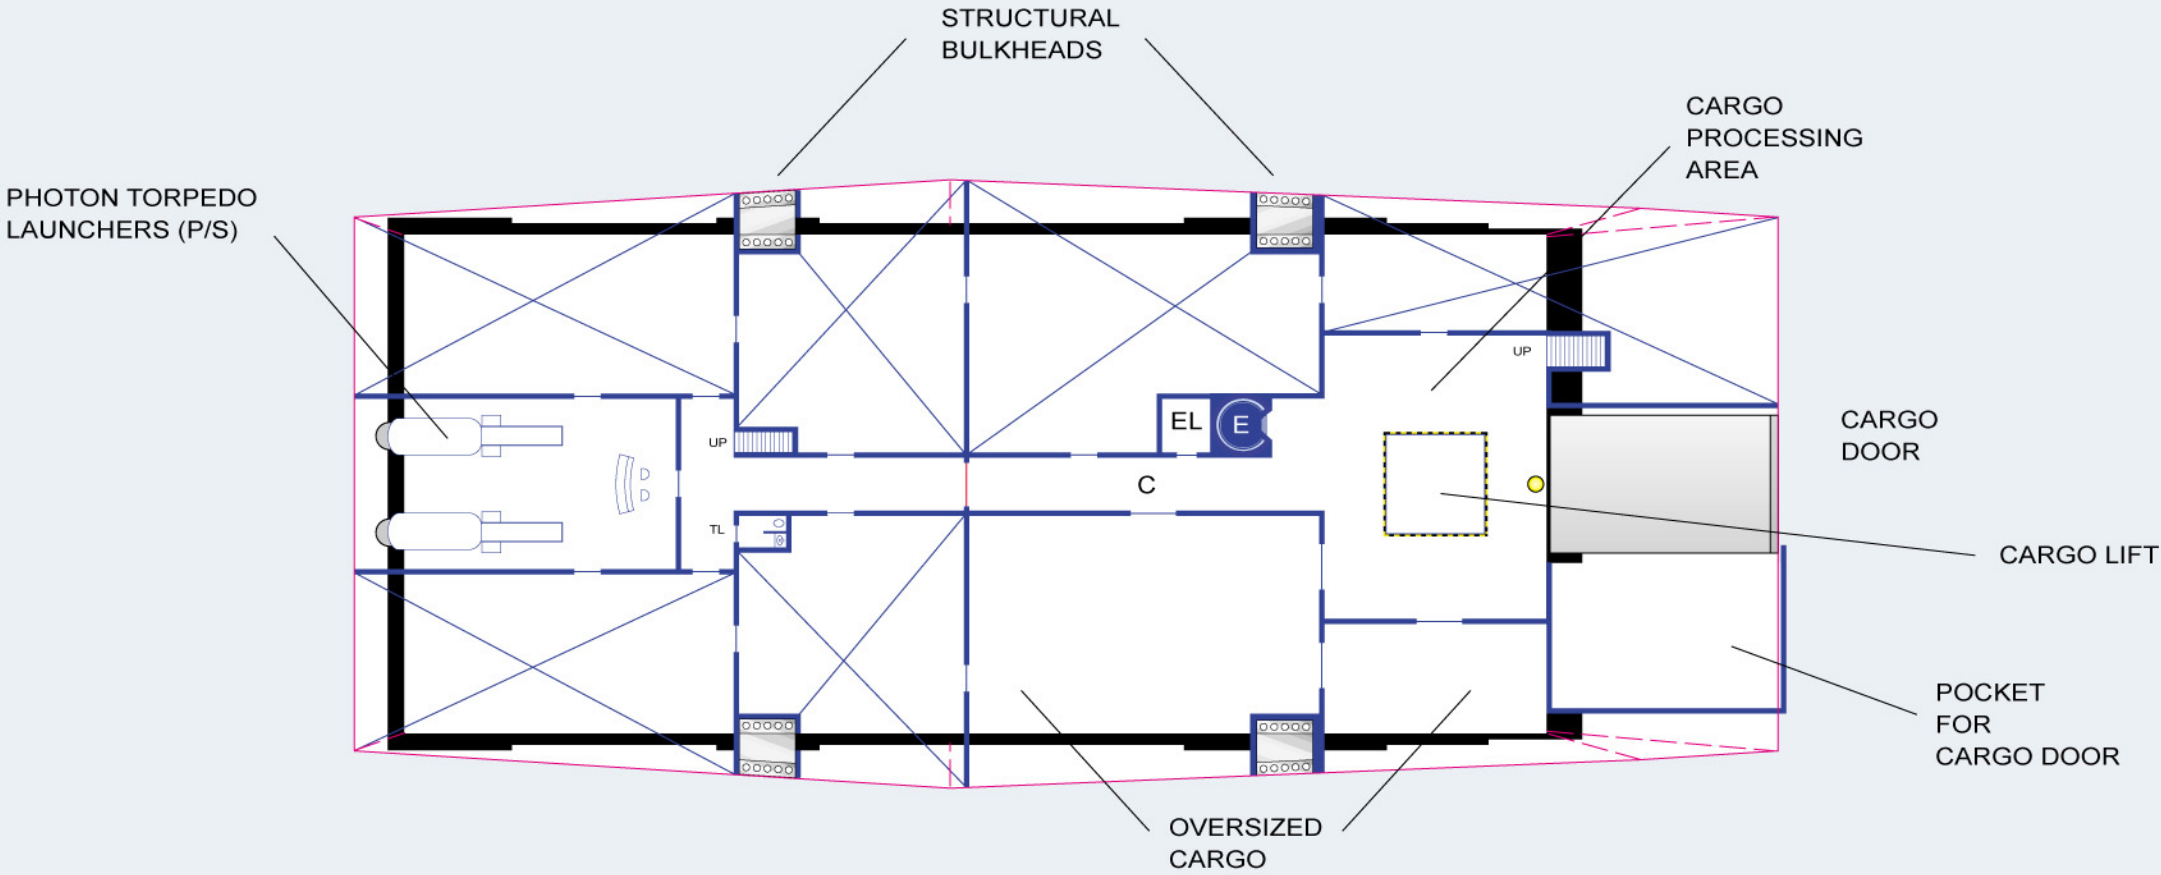

The Photon Torpedo Launchers are located at the front of this deck.

On either side of the Launchers are special Cargo Holds for the Torpedo casings. If you don't subscribe to the notion of physical casings for the Torpedoes, then these could be considered normal Cargo Holds. Another possibility is to think of these spaces as the location for Sensors for Target Acquisition and for Torpedo Tracking.

The remainder of the deck is filled with Cargo Holds.

The Cargo Lift reaches from Deck 16 up to Deck 13.

The port-rear section of this deck is for oversized cargo. It is for this reason that the Cargo Door is 2 decks tall.

DECK 16: PHOTON TORPEDO CONTROL / CARGO
