

If printed 17 inches tall (from black-outlined edge to black-outlined edge) the scale of these drawings is 1/350.

NOTES

- A** SEE PAGE 2
The location of the "Separation Plane" for each Warp Engine was extrapolated from details visible on Rick Sternbach's painting.
- B** SEE PAGE 2
The concept of a "Separation Plane" for the Command Module was extrapolated from the design philosophy of Starfleet as established in all the media. The location was determined by the layout of the parts of a resin model.
- C**
The Shuttlecraft shown here is from STAR TREK ENTERPRISE. It is the same approximate time period, and the size / shape fits with the Marshall-class.
- D** SEE PAGE 8
Antimatter is created / stored in the engine nacelles. In an emergency, the red-outlined panels swing open and the antimatter is ejected downwards.
