STARBOARD ENGINE INSPECTION STATION (Cross-section, Looking Aft)

STARBOARD ENGINE (Cross-section, Looking Forward)

GENERAL NOTES

In my previous blueprint sets I discuss stairs, ladders, and external markings for highlighting certain features . . . all relating back to what we see in the original STAR TREK episodes and what we see on the studio model of the U.S.S. ENTERPRISE.

None of that applies here, but we can still try to extrapolate backwards and imagine what the starships from the early days of the Federation must have looked like.

Notes relevant to each deck appear on the following pages.

I hope these pages provide you with some pleasure, information, and ideas for contemplation / consideration.

If I missed something, please let me know.
