

NOTES

DECK 5

The layout of this deck is very similar to the FJ design. I like the tri-radial symmetry of his design. However, his turbo-elevator shafts were not set at 120° so I adjusted them. There is also one turbo-elevator storage space.

I retained most of the Batteries, Air Conditioning, Water Pumps, etc. as well as the Phasers in the outermost ring around the Officers' Quarters. A few small changes were made to accommodate the Hangar Bay.

In the center are 3 relaxation areas. The one at the front is a Lounge. The other two are considered to be Messrooms because they are serviced by food dispensers which are directly connected to the Food Preparation area on Deck 8.

DECK 5: SENIOR OFFICERS' QUARTERS

DECK 5 (continued)

Environmental Lockers (EL) are distributed all around the deck. They can also be used as storage spaces.

The Piping / Wiring Trunk continues on both sides of the Hangar Bay and extends to the rear below the deck. It becomes visible at the extreme aft end, just above the Impulse Engines.
