

CUTAWAY SYMBOLS

	STRAIGHT WALL		DOORS
	CURVED WALL		LADDER ALCOVE
	CUTAWAY ALONG WALL		STAIRS
	INNER FACE OF HULL		RAILING
	CUTAWAY THROUGH DECK		TREE, SHRUB
	CUTAWAY ACROSS WALL		ACCESS TUNNEL
	CUTAWAY THROUGH DOOR		

NOTES

- A**
Romulan ships do not have "Warp" Engines. Artificial black holes are generated inside Quantum Singularity Confinement Chambers. At full power, Cherenkov Radiation causes these to glow blue.
- B**
The Impulse Engines are set far enough apart that maneuverability is possible, but some sort of thrust-vectoring is also installed within the hollow tubes at the rear of the engine nacelles.
- C**
These help generate the cloaking field around the ship.
- D**
The Tail contains the Tractor Beam and Atmosphere Storage Tanks for Hangar Bay Operations. It also provides some directional control during atmospheric flight.
- E**
These sensors are used by the Disruptor Weapons.
- F**
These sensors are part of the Deflector System.
- G**
This is main aperture for the Plasma Weapon.
- H**
Three Disposal Tubes are at the rear of the hull. The big one is in the base of the tail.
