

SHIP DATA

LENGTH: 136 m
WIDTH: 183 m
HEIGHT: 41 m

SHUTTLECRAFT: 2

PLASMA WEAPON: 1

DISRUPTORS: 2

MISSILES*: 50

* not confirmed

NOTES

A short passage from the script describes the Romulan vessel as "... a starship saucer main section . . . but with dark markings on its underside which suggests a bird-of-prey with half-spread wings."

There is only one known photo of this early scheme. See Photo C, below. The drawings on this page and the next 3 pages are extrapolations from this one photo.

The hull has been deleted for clarity.
