

NOTES

DECK 10

TMoST mentions Photon Torpedoes but not their location. Photon Torpedoes were shown in various episodes of STAR TREK to emanate from the underside of the Primary Hull, approximately the same place as the Phasers. Since TMoST states Phaser Banks are on Deck 11, the logical spot for Photon Torpedoes and their launch system is on Deck 10.

However, this class of ship does not carry Photon Torpedoes; they were replaced with more Cargo Holds.

The Deflector Equipment located in the center of the deck work with the Deflector Equipment and the Space Energy Field Sensors located in the bow of Deck 6 and Deck 7 and with the Main Sensor Dish.

DECK 10 DORSAL

Most of this deck is devoted to turbo-elevators, with a storage spot, in anticipation of heavy traffic that might result from whatever cargo is being carried and whatever mission is assigned.

DECK 11

Phasers are located on this deck.

DECK 11 (continued)

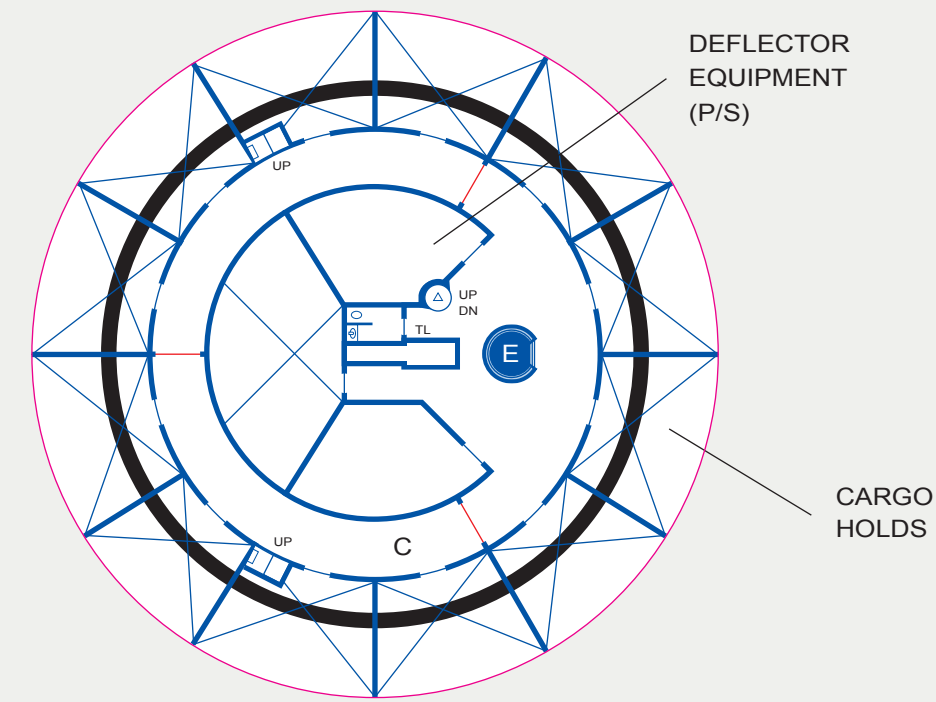

The equipment around the perimeter is for the Tractor Beam. The 3 Tractor Beam Controllers direct the Emitter so that the beam can locate and lock onto the object being towed.

The 3 pale gold-coloured recessed rings on the underside of the Primary Hull absorb and re-direct any back-scatter created by the Tractor Beam.

DECK 11 DORSAL

Most of this deck is devoted to turbo-elevators, with a storage spot, in anticipation of heavy traffic that might result from whatever cargo is being carried and whatever mission is assigned.

The hull of Deck 11 was extended slightly at the front to allow a direct vertical connection to the forward turbo-elevator shaft of the cargo containers.

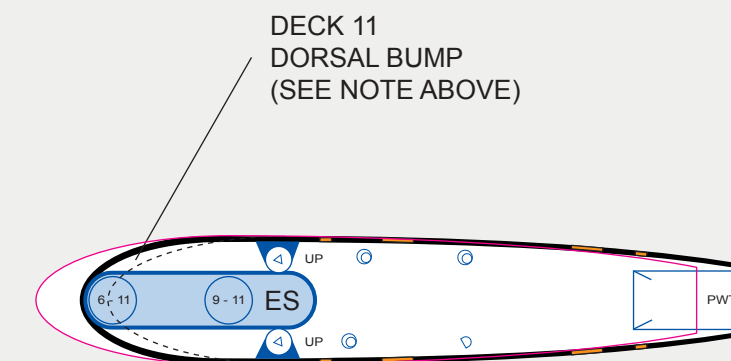

DECK 10: DEFLECTOR EQUIPMENT / CARGO

DECK 10: DORSAL

DECK 11: PHASERS / TRACTOR BEAM

DECK 11: DORSAL
