Mk. X	-	REPAIR FACILITY	PASSENGERS	-	500

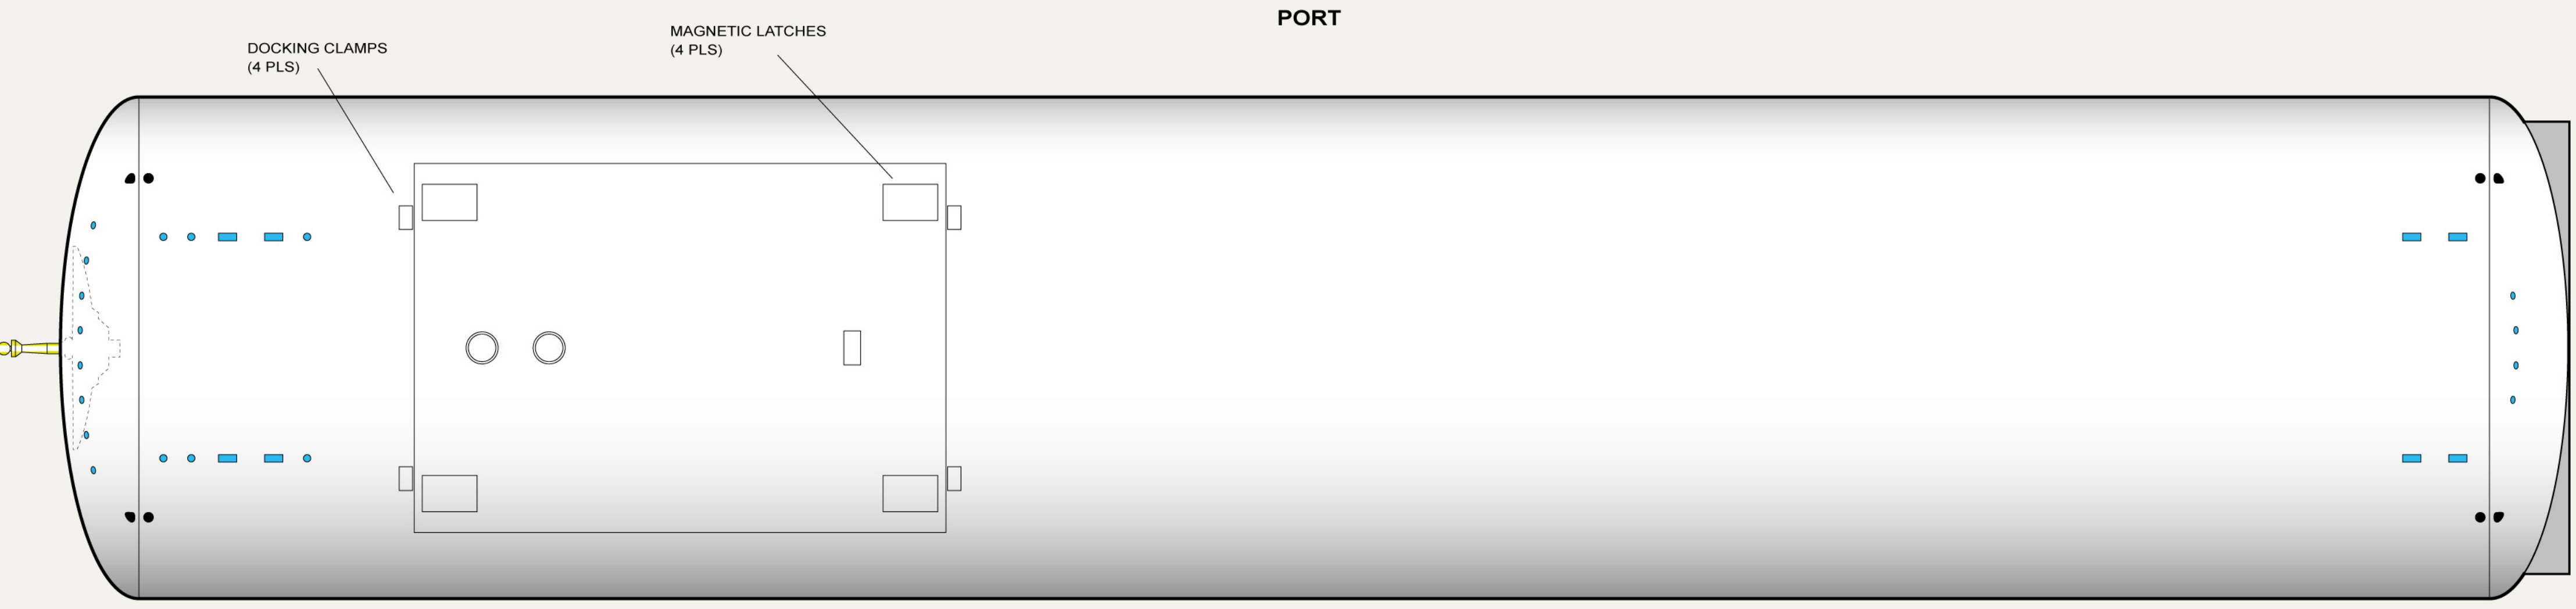

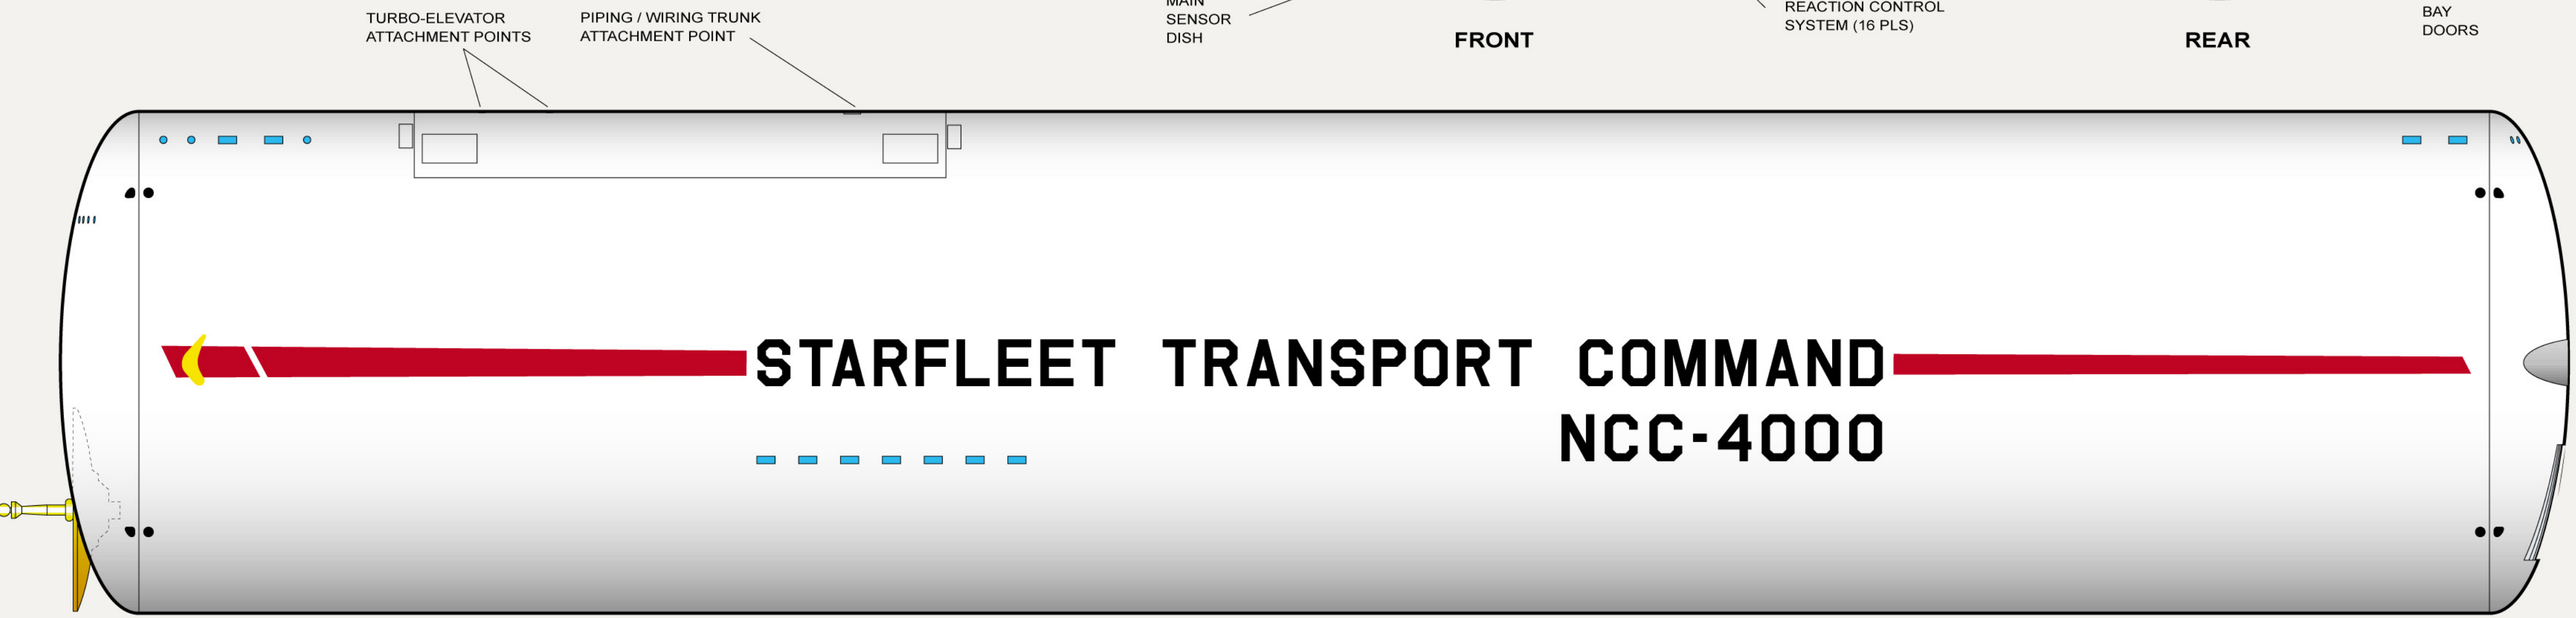

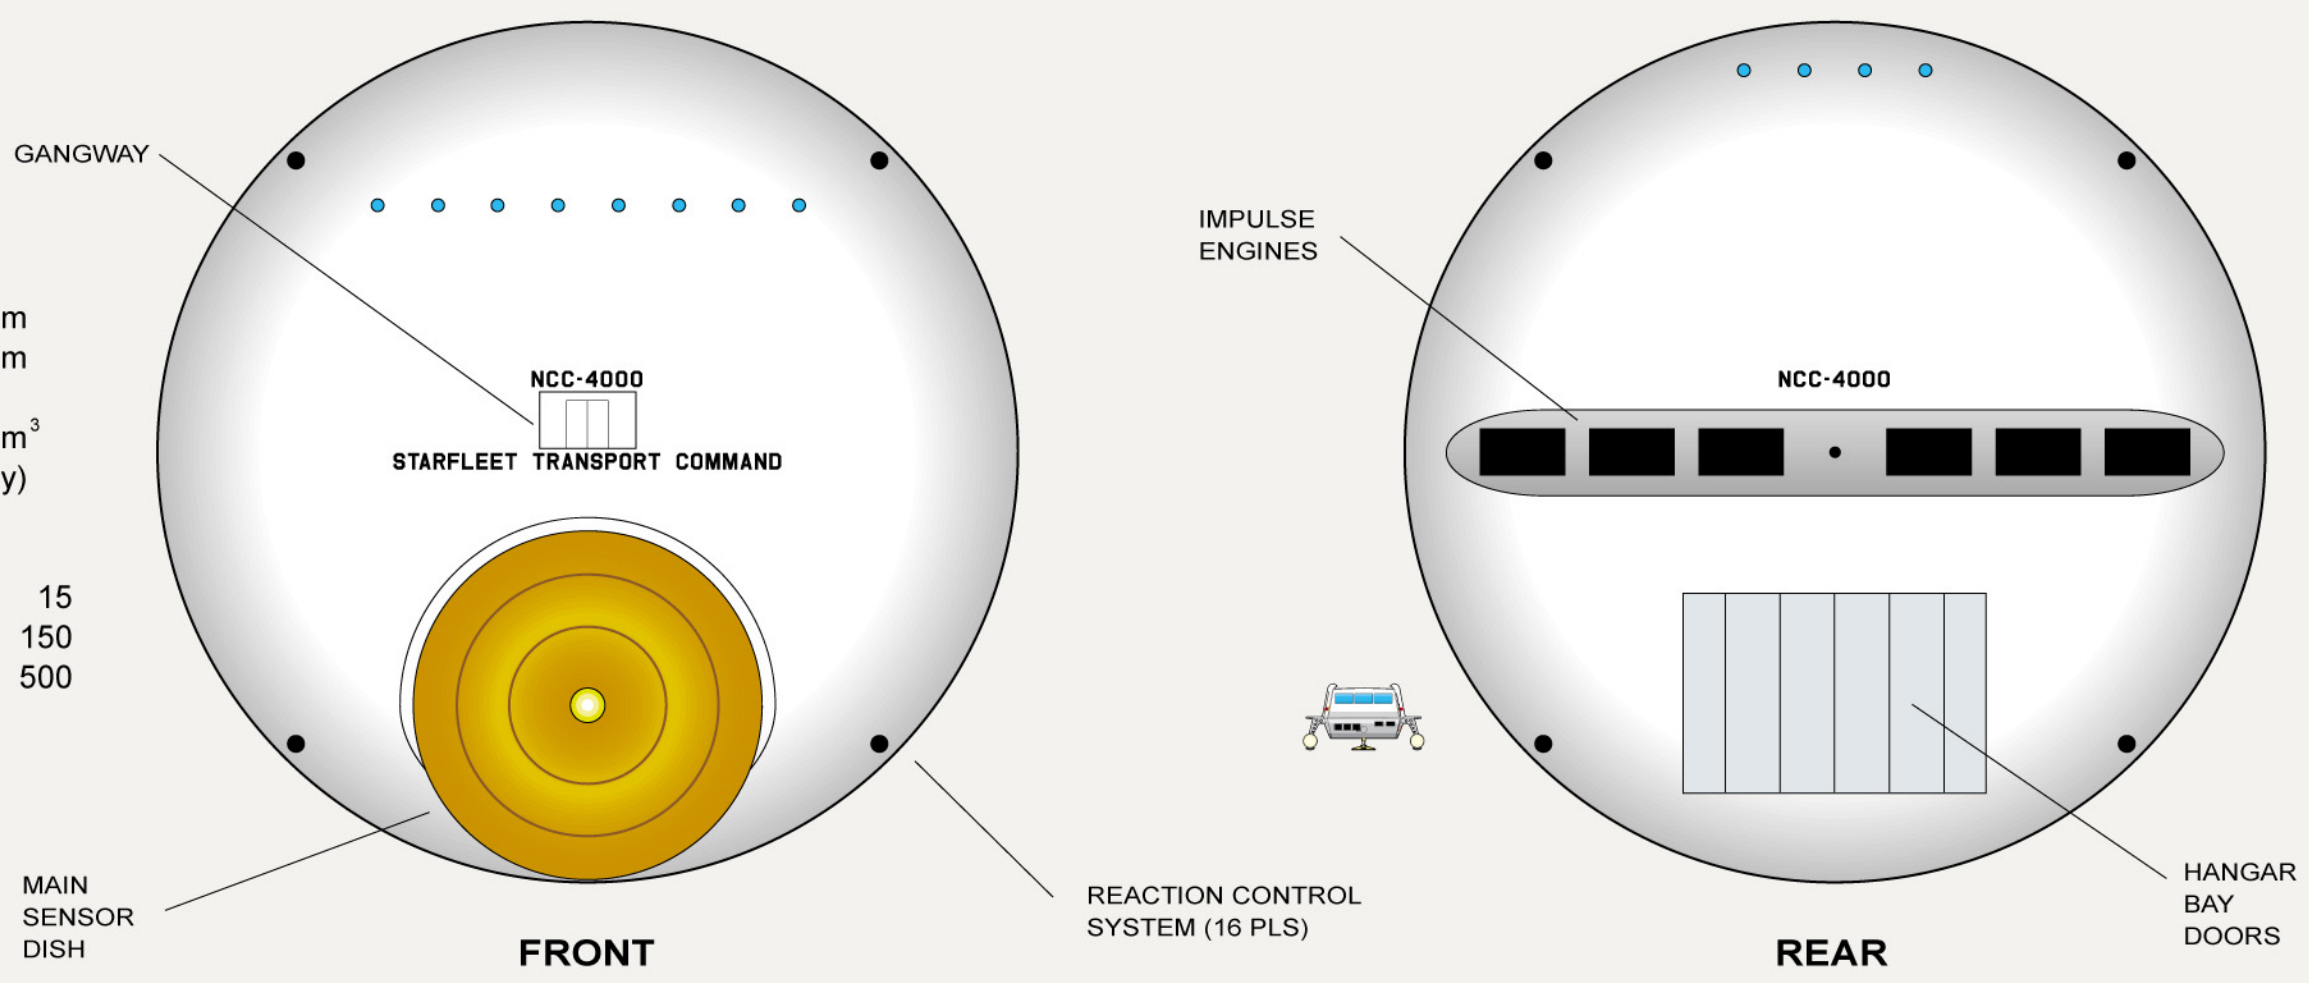

TONNAGE - Varies, depending on the cargo and the container type

NOTES

Transport containers are difficult to summarize on a single page. There are simply too many variations. The length and diameter is standardized. Everything else can be reconfigured.

All the transport containers have equipment for clamps and latches, two turbo-elevator attachment points, and a piping / wiring trunk attachment point ... all of which are compatible with the docking collar on the PTOLEMY-Class ship.

All transport containers also have a Reaction Control System.
