USS DAVENPORT

SYNOPSIS

Starfleet has always been at the forefront of defense for its fleet ships and the need for a lighter vessel to these ends has been a goal of designers throughout the federation. A lighter more maneuverable vessel as both a scout and a fleet defense ship was a goal that Starfleet pursued relentlessly and to this end the corvette was created.

With the success of both the Avimimus and Maxwell class of corvette. Starfleet wanted a ship that had slightly less mass and a bit more speed. Thus the Davenport Class was born.

By removing the torpedo bay the ships mass was reduced by several thousand metric tons without a loss of tactical abilities. Though the lack of torpedoes took away some of the ships offensive abilities. With the multidirectional phaser canons combined with maneuverability the ship still maintains a lethal combination of firepower and tactical capability.

Fleet tactical command has found that while working in groups of three or more, the Davenport class has been able to go head to head with even the larger Excelsior and Ingram class heavy cruisers and inflict simulated damage on a larger scale then predicted.

The Davenport has as of yet been involved in many engagements with Klingon forces, but it is believed that the Ships will have no problem in a direct conflict.

USS DAVENPORT

CLASS PERFORMANCE

The Uss Babichi Ncc-20544, Uss Zabashevka Ncc-20564, Uss Panzweiler Ncc-20591, Uss Chernyavka Ncc-20592 and Uss Vathakkalmadu Ncc-20616 have been on maneuvers with Tactical command to further test the ships abilities against larger more formidable vessels during simulated attacks on Starfleet space installations.

The Uss Zwinzen Ncc-20512, Uss La Clota Ncc-20524, Uss Imamli Ncc-20533, Uss Aba Wan Ncc-20551 and the Uss Frisco City Ncc-20621 with Corvette Group 100 under the command of CMDOR. Chiwani while on routine patrol of the area near Star Station 310 received a distress signal from a Corvallen freighter stating that they had hit a mine near a disputed section of space under the control of the Orion syndicate. CMDOR. Chiwani brought the group within range of the freighter and noted a single light freighter drifting with damage to the starboard side of the ship. The science officer of the Uss La Clota Ncc-20524 detected a debris field nearby and moved to scan for signs of what had caused the damage while the rest of the group moved to assist the freighter. On arrival at the debris field, the science officer noted a Klingon signature to the materials within the field. Capt. Chevosci of the Uss La Clota Ncc-20524 immediately notified CMDOR. Chiwani who ordered the group to yellow alert. All ships began scanning for other signs of the Klingons. But nothing was discovered. CMDOR. Chiwani believes that the mine that damaged the freighter might have been procured by the syndicate to protect its interests in the local system traffic areas. This incident is still under investigation.

The background of the page features a large, stylized Starfleet Command logo. It consists of a central gold and blue emblem with a silver starship silhouette, surrounded by a blue ring with the text "STARFLEET COMMAND" at the top and "UNITED FEDERATION OF PLANETS" at the bottom. The entire logo is set against a silver, metallic-looking circular border with a jagged, gear-like edge.

MASTERCOM DATA CENTER: This is where I got the initial cover photo idea to start this project.

Paramount Pictures and CBS television: For bringing me the inspiration for the work in the first place.

Gene Roddenberry (The Great Bird of the Galaxy): For having the idea of a future where all people could live together for a common goal. That of seeing what's out there.

All the Other Fans: Because we make this possible and keep the faith going to hope for that better future someday.
